

All New!

AP Series Plenum Fan

Models APM and APH

Greenheck's new AP series plenum fan is designed for today's air handler applications. Models APM and APH offer a value price point approach to your construction requirements. Both models utilize Greenheck's 12-blade aluminum airfoil wheel for low sound and high efficiency and are licensed to bear the AMCA Sound and Air Performance Seal.

- **Arrangement 4 Vertical**

APM sizes 15-24, APH sizes 15-40

Model APH

Model APM

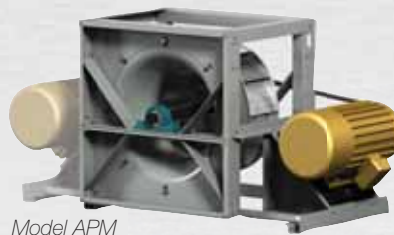

Model APH

- **Arrangement 3 Interchangeable Motor Position**

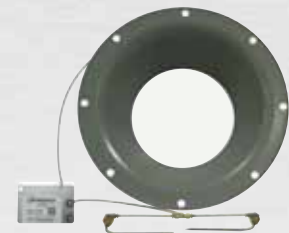

Arrangement 3 fans with motor position left or right can be field adjusted to allow changes during AHU construction.

Model APM

- **Airflow Measuring**

- Single pressure port on inlet cone allowing for easy field airflow measurements (standard)
- Sure-Aire™ flow measurement (piezometric ring) with or without transducer (optional)

Sure-Aire

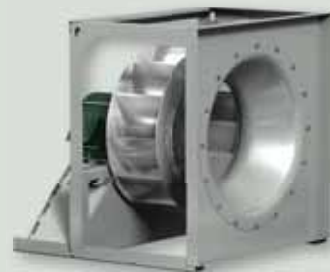

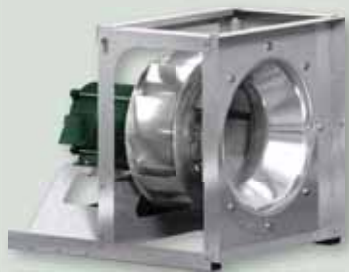

- **Improved Lead Time**

With the time between quote, order and delivery getting shorter, Greenheck is introducing new programs to speedup delivery of fans to keep your project on schedule. Fast Pass speeds up lead time to 15 days on common fan configurations with no price impact.

Quick Build can get your fan shipped fast. If time is critical your fan can ship in as little as 5 or 10 days.

Program	Lead Time
Standard	4 week
Fast Pass	15 Day (3 weeks)
Quick Build	5 Day, 10 Day
