# Application

Model FSDR-511 is a combination fire smoke damper with round style blades. The FSDR-511 is qualified to 4,000 fpm (20.3 m/s) and 4 in. wg (1kPa) for operation and dynamic closure in emergency fire smoke situations. Model FSDR-511 may be installed vertically (with blades running horizontal) or horizontally and is rated for airflow and leakage in either direction.

## Ratings

#### **UL 555 Fire Resistance Rating**

Fire Rating: 1<sup>1</sup>/<sub>2</sub> hours

Dynamic Closure Rating: Actual ratings are size dependent Velocity: Up to 4000 fpm (20.3 m/s) Pressure: Up to 4 in. wg (1 kPa)

### UL 555S Leakage Rating

Leakage Class: I

Operational Rating: Actual ratings are size dependent Velocity: Up to 4000 fpm (20.3 m/s) Pressure: Up to 4 in. wg (1 kPa) Temperature: Up to 350°F (177°C) - depending upon the actuator

# **Pressure Drop Data**

This pressure drop testing was conducted in accordance with AMCA Standard 500-D using the configuration shown. All data has been corrected to represent standard air at a density of .075 lb/ft<sup>3</sup>(1.201 kg/m<sup>3</sup>).

Actual pressure drop found in any HVAC system is a combination of many factors. This pressure drop information along with an analysis of other system influences should be used to estimate actual pressure losses for a damper installed in a given HVAC system.

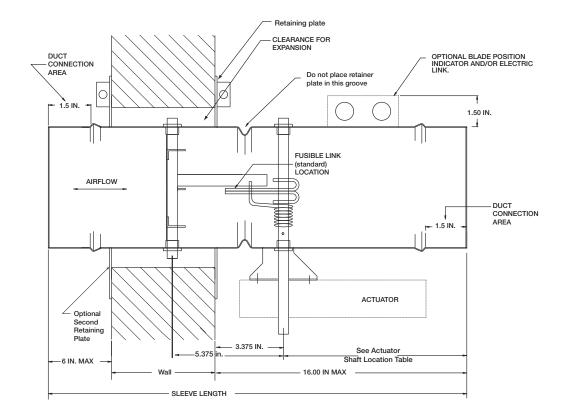

## **AMCA Test Figures**

Figure 5.3 Illustrates a fully ducted damper. This configuration has the lowest pressure drop of the three test configurations because entrance and exit losses are minimized by straight duct runs upstream and downstream of the damper.
