

GreenJet® GJI

GREENJET MIXED FLOW JET FAN

GreenJet Mixed Flow Jet Fan

Greenheck's GJI low-profile mixed flow jet fan is designed for parking garage and air movement applications.

Cars operating **in an enclosed parking structure** emit carbon monoxide (CO) and other noxious fumes into the atmosphere. An **efficient ventilation system** is needed to remove these toxins and circulate fresh air into the parking garage. The GJI model is a ductless jet fan that improves mixing air while moving contaminants toward the exhaust. With the low profile, it easily fits in tight spaces, moving clean air in hard-to-ventilate as well as open areas.

Benefits

- Low profile for more clearance.
- Unique design outlet vanes - improves air throw distance, making each fan more effective.
- Control options with 0-10VDC signal or locally mounted speed dial.

Low profile maximizes the clearance height for vehicles or installations when space and driving clearance is limited.

APPLICATION

Parking Garage – Improved air mixing by pulling air from the back and pushing contaminants toward exhaust outlets.

GreenJet® GJI

GREENJET MIXED FLOW JET FAN

PERFORMANCE

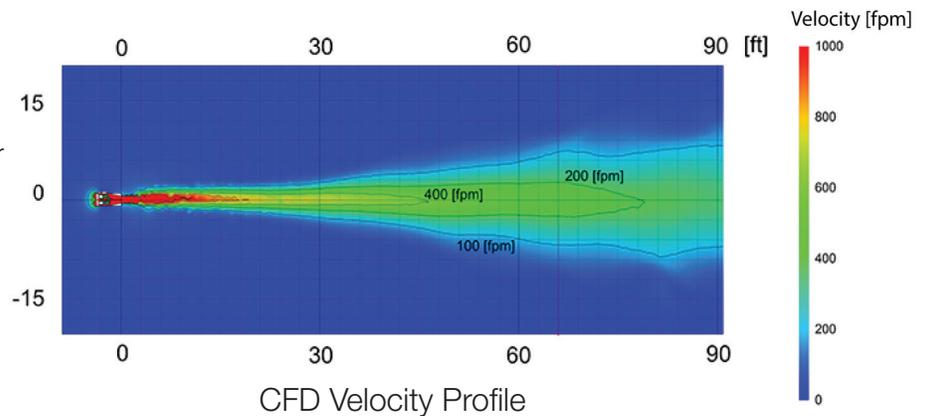

Size	Volume CFM (cmh)	Throw Distance* ft (m)	Thrust** lbf (N)	Total Sound dBA		Total Power hp
				5 ft (1.5 m)	10 ft (3 m)	
26	2,130 (3,600)	80 (24)	6 (26)	78	72	1
50	3,840 (6,520)	84 (26)	10 (45)	73	67	2

*At 200 fpm terminal velocity (at 0.5 m/s)

**At standard air

FEATURES

- Built-in NEMA 3R disconnect
- Composite mixed flow wheel
- Exterior finish galvanized or powder coated
- Quick connect terminal strip for easy power and control wiring connection
- Galvanized inlet guard
- UL/cUL-705 listed for power ventilators

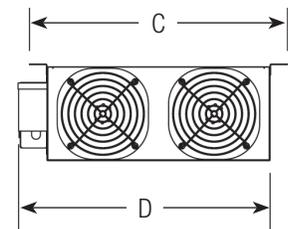

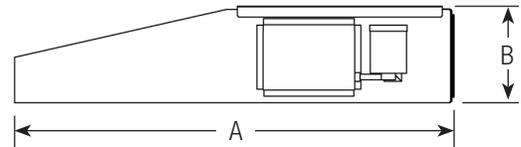

MOTOR

- Electronically commutated (EC)
- Control with 0-10VDC signal or locally mounted speed dial
- IP40 enclosure
- 115/208 ~ 230/277 Volts, 60/50 Hz, 1 Phase

DIMENSIONAL INFORMATION

Size	A	B	C	D
26	50.4 (128)	11.1 (28)	29.5 (75)	28.8 (73)
50	70.4 (179)	14.6 (37)	39.0 (99)	40.1 (102)

Dimensions are in inches (cm).
