

Boost Efficiency. Simplify Operation.

Optional AMPLIFY™ controls enable easy operation of AMPLIFY™ overhead fans while maximizing efficiency. Designed for convenience and versatility, AMPLIFY™ controls run one or multiple overhead fans with common communication protocols and are available with surface or recessed mounting kits.

KEYPAD CONTROL

- Cost-effective option offers complete control of an overhead fan system in a small, easy to operate, wall-mounted package.
- Allows user to operate 1, 3, 5, or 10 fans of the same model and size as a group, with all fans running at the same speed and direction.
- Provides full status monitoring capability and fault-logging, making this an excellent stand-alone control solution.
- Not compatible with DC-5 4.3 to 7-foot sizes.

STANDARD TOUCHSCREEN CONTROL

- Sleek design fits in a standard 2x4 junction box and has an intuitive LCD screen.
- Allows user to operate 1, 3, 5, or 10 fans with any combination of models and sizes for increased flexibility.
- Touchscreen offers password protection along with advanced diagnostics for easy troubleshooting.

ADVANCED TOUCHSCREEN CONTROL WITH BACnet®

- Premium option offers advanced capabilities for overhead fan system control with the simplicity of an intuitive LCD.
- Allows user to group or independently control 10 or 20 fans with any combination of models and sizes for optimum flexibility and convenience.
- Advanced touchscreen supports fan scheduling, password protection, advanced fan diagnostics, and the ability to communicate with a building management system (BMS) through BACnet® MS/TP.
- Available with optional temperature and humidity sensors to further boost occupant comfort.
