

Ceiling Diffusers

BUILDING VALUE IN AIR.

October
2022

TABLE OF CONTENTS

The Greenheck line of ceiling diffusers is designed for flexibility in application. This series covers a full range of ceiling diffusers which include square face cone, louvered face, concentric supply/return, modular, perforated, round and VAV diffusers.

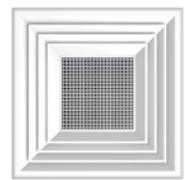

Square face cone diffusers are the most popular and efficient of the ceiling diffusers. The square cone diffuser provides a true 360° radial horizontal air flow pattern.

PAGE 3

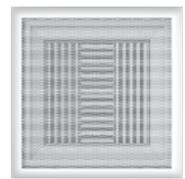

Louvered face diffusers provide an aesthetically pleasing solution for applications requiring large volumes of air at low sound levels and low pressure drops. These units are available in 1, 2, 3 and 4-way air pattern variations that are virtually limitless due to the unique assembly of these diffusers.

PAGE 30

Concentric supply/return diffusers provide an aesthetically pleasing yet functional solution to Roof Top package single outlet air distribution requirements. The high induction design ensures a true horizontal air pattern and rapid mixing of room and primary air.

PAGE 86

Perforated ceiling diffusers are designed to provide a smooth, even appearance that blends into the ceiling. Perforated supply diffusers are available with adjustable pattern controllers on either the face or neck or modular cores which provide an excellent air pattern.

PAGE 101

Round ceiling diffusers are available in a broad range of sizes and models from the economical to industrial and architectural. These units are typically installed in sheet rock or exposed duct and are available with adjustable deflectors that allow the option for either horizontal or vertical flow. An excellent choice for gymnasiums, industrial facilities and large retail outlets.

PAGE 188

VAV diffusers are designed to provide individual VAV control at the individual diffuser level.

PAGE 207

Ceiling diffuser accessories are primarily designed to improve the overall air handling performance of the system. Proper application of duct and outlet accessories aide in the control of the air distribution system.

SQUARE CEILING DIFFUSERS

MODELS XG-5700 / XG-5700A

MODELS XG-5800 / XG-5800A

MODEL XG-5750

MODEL XG-PHENOMENATOR

Models XG-5700 / XG-5700A 2 Cone diffusers are designed to efficiently handle cooling temperature differentials of 18-20°F at ceiling heights of 8' to 10'. The round neck to square face design provides a uniform 360° fixed horizontal air diffusion pattern. For applications requiring a vertical air flow, the XG-5700A adjustable model employs movable air deflecting vanes which will provide vertical downward airflow.

PAGE 4

Model XG-5750 offers the architect the often preferred appearance of a single air diffusion panel. The diffuser is designed to efficiently handle cooling temperature differentials of 18-20°F at ceiling heights of 8' to 10'.

PAGE 9

Models XG-5800 / XG-5800A 3 Cone diffusers are designed to efficiently handle cooling temperature differentials of 18-20°F at ceiling heights of 8' to 10'. The round neck to square face design provides a uniform 360° fixed horizontal air diffusion pattern. For applications requiring a vertical air flow, the XG-5800A adjustable model employs movable air deflecting vanes which will provide vertical downward airflow.

PAGE 16

Model XG-Phenomenator has the highest induction ratio of any commercial air diffuser available. It is an excellent selection for providing exceptional comfort, especially in executive offices, conference rooms and board rooms. The XG-Phenomenator is designed for applications calling for minimal temperature differences in a space.

MODEL XG-5700

Two Cone Square Face Diffuser with Round Neck

XG-5700-1 - Surface Mount XG-5700-6 - T-bar Lay-in
XG-5700-7 - Concealed Spline XG-5700-9 - Donn Finline Lay-in

Non-Adjustable, Horizontal Discharge Pattern

Air inlets shall be model XG-5700 manufactured by GREENHECK shall be constructed of steel.

Air inlets shall be model XG-5700 AS manufactured by GREENHECK shall be constructed of aluminized steel. Air inlets shall be model XG-5700 AL manufactured by GREENHECK shall be constructed of aluminum.

Units shall be square with a formed backpan and two inner cones. Outlet shall have the same appearance from the face regardless of inlet size. The units shall be the size and quantity as outlined in the plans and specifications.

Inlets shall be drawn into the backpan of the diffuser. Welded inlets are not acceptable. Diffusers shall include seismic tabs drawn into the backpan. Inner cone assemble shall be removable without the aid of tools to access the optional damper and for installation if needed. Units requiring tools such as screwdrivers or hex keys to remove the inner cones are not acceptable.

The bottom cone shall have a removable plug in the center to allow access to adjust an optional damper. Units shall include the option to allow a field installed third optional cone accessory model Snap-58. Optional third cone shall be installed into the bottom of the 5700 diffuser without the use of tools.

Units shall be designed to integrate into the specified ceiling system.

Optional for Adjustable Pattern

Outlet shall include adjustable deflector blades located within the cones of the device. Deflectors shall allow the discharge air to be adjusted to obtain a vertical or horizontal air pattern.

XG-5700A-1 - Surface Mount XG-5700A-6 - T-bar Lay-in
XG-5700A-7 - Concealed Spline XG-5700A-9 - Donn Finline Lay-in

Adjustable Discharge Pattern

Air inlets shall be model XG-5700A manufactured by GREENHECK shall be constructed of steel.

Air inlets shall be model XG-5700A AS manufactured by GREENHECK shall be constructed of aluminized steel. Air inlets shall be model XG-5700A AL manufactured by GREENHECK shall be constructed of aluminum.

Optional Dampers and Accessories

Butterfly Damper

GREENHECK model XG-BDS aluminum round butterfly type dampers shall be provided. Damper shall consist of two butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screwdriver slot that can be assessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Equalizing Grid

GREENHECK model XG-G3 aluminum round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

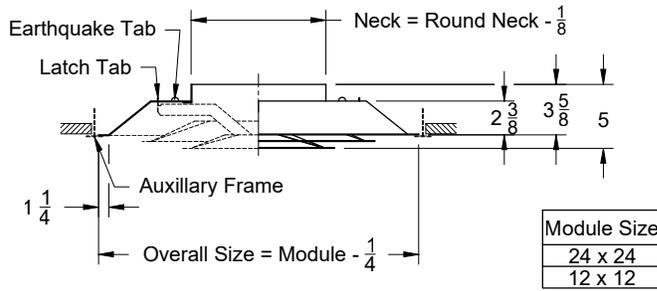

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

PERFORMANCE NOTES FOR SERIES XG-5700

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

fpm Velocity of air stream in Feet per Minute

Pv Velocity pressure (inches of water column)

Pt Total pressure (inches of water column)

Ps Static pressure = Pt-Pv (inches of water column)

Throw* Non-isothermal horizontal throw (supply air temperature 15°F colder than average room temperature); values are for 150, 100 and 50fpm velocities

Throw Isothermal throw (supply air temperature the same as average room temperature); values are for 150, 100 and 50fpm velocities

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10⁻¹² watts minus a 10dB room attenuation in all octave bands

Vn Neck Velocity

MODEL XG-5750

XG-5750-7 - Concealed Spline

XG-5750-9 - Donn Finline Lay-in

Air inlets shall be model XG-5750 manufactured by GREENHECK and shall be constructed of steel.

Air inlets shall be model XG-5750 AS manufactured by GREENHECK and shall be constructed of aluminized steel. Air inlets shall be model XG-5750 AL manufactured by GREENHECK and shall be constructed of aluminum.

Units shall be square with a formed backpan and a flat face panel. Face panel shall project no more than 1/4" below the ceiling grid or surface. Outlet shall have the same appearance from the face regardless of inlet size. The units shall be the size and quantity as outlined in the plans and specifications.

Inlets shall be drawn into the backpan of the diffuser. Welded inlets are not acceptable. Diffusers shall include seismic tabs drawn into the backpan. Face panel shall be removable without the aid of tools to access optional damper and if needed for installation. Units requiring tools to remove the face panel are not acceptable.

Units shall be designed to integrate into the specified ceiling system.

Optional Dampers and Accessories

Butterfly Damper

GREENHECK model XG-BDS aluminum, round butterfly type dampers shall be provided. Damper shall consist of two butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Opposed Blade Damper

GREENHECK model XG-D3 aluminum or XG-SD3 Steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Equalizing Grid

GREENHECK model XG-G3 aluminum, round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre treatment including a pressurized spray stage using an alkaline cleaner and a de ionized water rinse.

PERFORMANCE NOTES FOR SERIES XG-5750

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

fpm Velocity of air stream in Feet per Minute

Pv Velocity pressure (inches of water column)

Pt Total pressure (inches of water column)

Ps Static pressure = Pt-Pv (inches of water column)

Throw* Non-isothermal horizontal throw (supply air temperature 15°F colder than average room temperature); values are for 150, 100 and 50fpm velocities

Throw Isothermal throw (supply air temperature the same as average room temperature); values are for 150, 100 and 50fpm velocities

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10⁻¹² watts minus a 10dB room attenuation in all octave bands

Vn Neck Velocity

MODEL XG-5800

Three Cone Square Face Diffuser with Round Neck

XG-5800-1 - Surface Mount

XG-5800-6 - T-bar Lay-in

XG-5800-7 - Concealed Spline

XG-5800-9 - Donn Finline Lay-in

Non-Adjustable, Horizontal Discharge Pattern

Air inlets shall be model XG-5800 manufactured by GREENHECK shall be constructed of steel.

Air inlets shall be model XG-5800 AS manufactured by GREENHECK shall be constructed of aluminized steel. Air inlets shall be model XG-5800 AL manufactured by GREENHECK shall be constructed of aluminum.

Units shall be square with a formed backpan and three inner cones. Outlet shall have the same appearance from the face regardless of inlet size. The units shall be the size and quantity as outlined in the plans and specifications.

Inlets shall be drawn into the backpan of the diffuser. Welded inlets are not acceptable. Diffusers shall include seismic tabs drawn into the backpan. Inner cone assemble shall be removable without the aid of tools to access the optional damper and for installation if needed. Units requiring tools such as screwdrivers or hex keys to remove the inner cones are not acceptable.

The bottom cone shall have a removable plug in the center to allow access to adjust an optional damper.

Units shall be designed to integrate into the specified ceiling system.

Optional for Adjustable Pattern

Outlet shall include adjustable deflector blades located within the cones of the device. Deflectors shall allow the discharge air to be adjusted to obtain a vertical or horizontal air pattern.

XG-5800A-1 - Surface Mount
XG-5800A-6 - T-bar Lay-in
XG-5800A-7 - Concealed Spline
XG-5800A-9 - Donn Finline Lay-in

Adjustable Discharge Pattern

Air inlets shall be model XG-5800A manufactured by GREENHECK shall be constructed of steel.

Air inlets shall be model XG-5800A AS manufactured by GREENHECK shall be constructed of aluminized steel. Air inlets shall be model 5800A AL manufactured by GREENHECK shall be constructed of aluminum.

Optional Dampers and Accessories

Butterfly Damper

GREENHECK model XG-BDS aluminum round butterfly type dampers shall be provided. Damper shall consist of three butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screwdriver slot that can be assessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Equalizing Grid

GREENHECK model XG-G3 aluminum round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

PERFORMANCE NOTES FOR SERIES XG-5800

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

fpm Velocity of air stream in Feet per Minute

Pv Velocity pressure (inches of water column)

Pt Total pressure (inches of water column)

Ps Static pressure = $P_t - P_v$ (inches of water column)

Throw* Non-isothermal horizontal throw (supply air temperature 15°F colder than average room temperature); values are for 150, 100 and 50fpm velocities

Throw Isothermal throw (supply air temperature the same as average room temperature); values are for 150, 100 and 50fpm velocities

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10^{-12} watts minus a 10dB room attenuation in all octave bands

Vn Neck Velocity

MODEL XG-Phenomenator

Air Outlets shall be model:

XG-Phenom-1 - Surface Mount

XG-Phenom-6 - T-bar Lay-in

XG-Phenom-7 - Concealed Spline

XG-Phenom-9 - Donn Finline Lay-in

XG-Phenom manufactured by GREENHECK. Units shall be constructed of steel.

XG-Phenom AS manufactured by GREENHECK. Units shall be constructed of aluminized steel.

Units shall be square with a formed backpan, flat panel face, and a high induction inner high induction core assembly. The face panel of the outlet shall project no more than 1/4" below the ceiling grid. The units shall be the size and quantity as outline in the plans and specifications.

Inlets shall be drawn into the backpan of the diffuser. Welded inlets are not acceptable. Diffusers shall include seismic tabs drawn into the backpan.

Face panel shall be held in place with hooks are secured through the backpan and be removable without the aid of tools. Units with face panels held in place with springs or clips are not acceptable.

Inner core assembly shall be steel and include a gasket between the core and the backpan. The high induction core assembly shall produce a four way discharge pattern through a series of nozzles to maximize induction and comfort. ADPI for the diffuser shall be a minimum of 97 in typical applications.

Units shall be designed to integrate into the specified ceiling system.

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

XG-5000

MODEL XG-5000

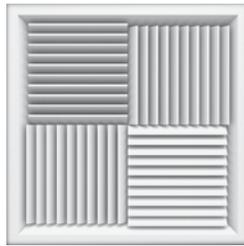

MODELS XG-5500 & XG-5000S

MODEL XG-5500DD

MODEL XG-9000

Model XG-5000 deflector blades are straight and do not include a horizontal lip, which makes it an excellent choice for high capacity applications. The high induction feature ensures draft free conditions in high ceiling applications.

PAGE 30

Models XG-5500 and XG-5500S incorporate a horizontal lip to create a high induction rate for rapid mixing of room air and primary air. The high induction feature ensures draft free conditions in low ceiling applications.

PAGE 50

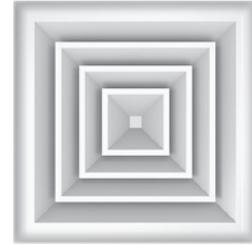

Model XG-5500DD is designed to allow an optional ceiling tile (by others) to be installed from the face of the diffuser without having to remove the plenum. The unique horizontal lip on all sides of the diffuser face provides a horizontal air pattern that is tight to the ceiling.

PAGE 62

Model XG-9000 is a modular adjustable air diffuser engineered for supply air distribution. It is designed for ceiling installation and can be adjusted quickly and easily by rearranging the air pattern cores.

PAGE 67

MODEL XG-5000

- XG-5000-1 – Surface Mount**
- XG-5000-4 – Drop Face**
- XG-5000-46 – Drop Face – T-Bar Lay-in**
- XG- 5000-6 – T-bar Lay-in**
- XG-5000-7 – Concealed Spline**
- XG-5000-8 – Tegular Lay-in**
- XG-5000-9 – Donn Finline**

Air Outlets shall be aluminum model XG-5000 manufactured by GREENHECK. Units shall consist of a fixed pattern louvered core fastened into a border with spring loaded latches. Core shall be removable without the use of tools. Outlets shall be engineered for high capacity applications and include straight deflector blades (without a horizontal lip). Units with a horizontal lip at the ends of the deflector blades are not acceptable. The units shall be the size and quantity as outlined in the plans and specifications.

Outlets shall be available in 1, 2 way opposite, 2 way corner, 3, and 4 way directional air patterns. Units shall be designed to integrate into the specified ceiling system.

Options

Adjustable Pattern (horizontal to vertical)

Outlets shall include adjustable air pattern deflector blades that allows the air pattern to be set from vertical to horizontal (Optional APD Air Pattern Deflectors). Air pattern deflector blades shall be accessible from the face and the diffuser and adjustable without the use of tools.

IV Induction Vanes

Units shall include IV induction vanes factory mounted onto the back side of the deflector vanes. IV vanes shall increase the induction rate of the diffuser.

Accessories

Optional Dampers

Aluminum XG-D5A or Steel XG-D5 opposed blade dampers shall be provided. Damper shall be adjusted using a handle accessible through the face of the diffuser.

Screwdriver slot operators are not allowed.

Performance Specification

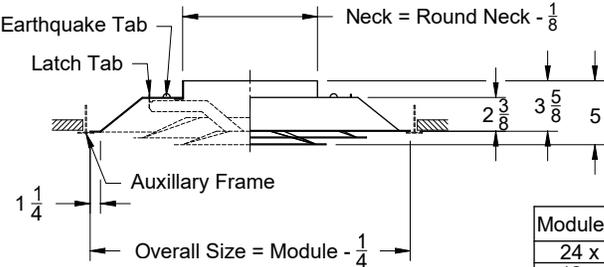

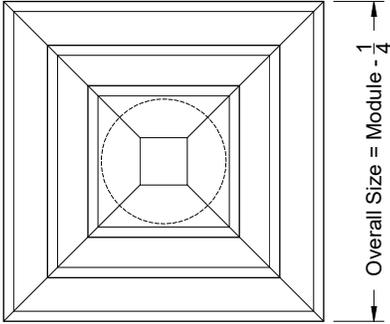

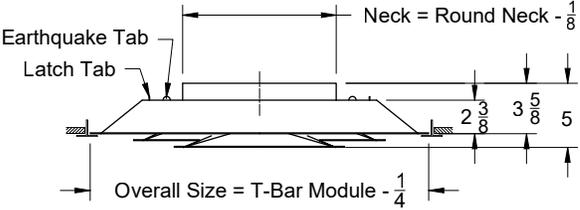

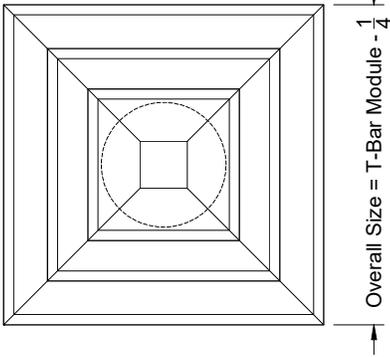

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006.

PERFORMANCE NOTES FOR SERIES XG-5000

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM	Cubic Feet Per Minute (air)
Horizontal Throw	Throw distance in feet at terminal velocities of 150fpm, 100fpm and 50fpm
NC	noise criteria, sound pressure level. NC ratings are based on sound power level (Lw) Re 10-12 watts minus a 10dB room attenuation in all octave bands
Ps	Static pressure. Diffuser only
Pt	Total pressure. Includes plenum and inlet size listed and is the sum of velocity and static pressure
Pv	Velocity pressure
fpm	Velocity of air stream in Feet Per Minute
Ps-H	Static pressure horizontal
Ps-V	Static pressure vertical
Pt-V	Total pressure vertical
Throw H C	Throw horizontal cooling
Throw V C	Throw vertical cooling
Throw V H	Vertical heating

MODEL XG-5500

Louvered Face Aluminum Supply Diffuser

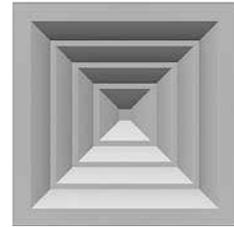

XG-5500-1 – Surface Mount

XG-5500-6 – T-bar Lay-in

XG-5500-7 – Concealed Spline

XG-5500-8 – Tegular Lay-in

XG-5500-9 – Donn Fineline Lay-in

Air Outlets shall be aluminum model XG-5500 manufactured by GREENHECK. Units shall consist of a fixed pattern louvered core fastened into a border with spring loaded latches. Core shall be removable without the use of tools. Outlets shall be engineered to perform in variable volume systems and include deflector blades with a horizontal lip to provide longer throw distances.

Outlets shall be available in 1, 2-way opposite, 2-way corner, 3, and 4-way directional air patterns.

The units shall be the size and quantity as outlined in the plans and specifications.

MODEL XG-5500S

Louvered Face Steel Supply Diffuser

XG-5500S-1 – Surface Mount

XG-5500S-6 – T-bar Lay-in

XG-5500S-8 – Tegular Lay-in

XG-5500S-9 – Donn Finline Lay-in

Air Outlets shall be steel model XG-5500S manufactured by GREENHECK. Units shall consist of a fixed pattern louvered core fastened into a border with spring loaded latches. Core shall be removable without the use of tools. Outlets shall be engineered to perform in variable volume systems and include deflector blades with a horizontal lip to provide longer throw distances.

Outlets shall be available in 1, 2-way opposite, 2-way corner, 3, and 4-way directional air patterns.

The units shall be the size and quantity as outlined in the plans and specifications.

For Surface mounting:

Units shall be designed for surface mounting applications and be provided with counter sunk screw holes on the face of the device.

For T-Bar Lay-in:

Units shall be designed to integrate into the specified ceiling system.

Options:

Adjustable Pattern (horizontal to vertical)

Outlets shall include adjustable air pattern deflector blades that allows the air pattern to be set from vertical to horizontal (Optional XG-APD Air Pattern Deflectors). Air pattern deflector blades shall be accessible from the face and the diffuser and adjustable without the use of tools.

IV Induction Vanes

Units shall include IV induction vanes factory mounted onto the back side of the deflector vanes. IV vanes shall increase the induction rate of the diffuser.

Accessories

Optional Dampers

Aluminum XG-D5A or Steel XG-D5 opposed blade dampers shall be provided. Damper shall be adjusted using a handle accessible through the face of the diffuser. Screwdriver slot operators are not allowed.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

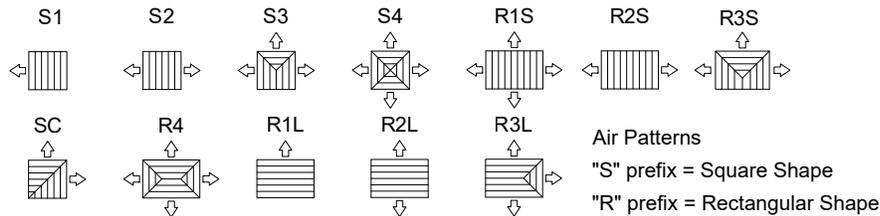

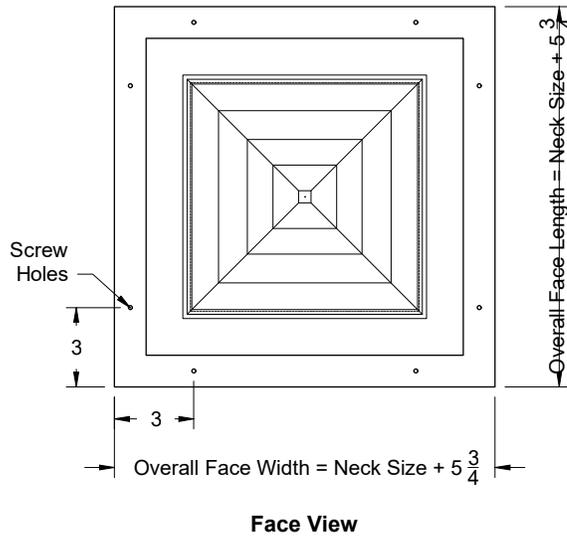

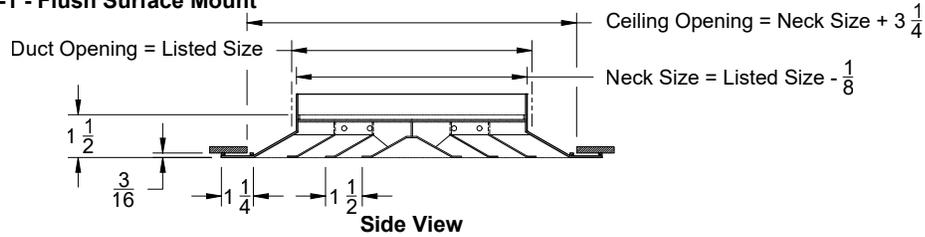

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

LOUVERED FACE DIFFUSERS

XG-5000/XG-5500S

PERFORMANCE NOTES FOR SERIES XG-5500/XG-5500S

All data is tested in accordance with ANSI/ASHRAE 70-2006

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

Horizontal Throw Throw distance in feet at terminal velocities of 150fpm and 50fpm.

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10^{-12} watts minus a 10dB room attenuation in all octave bands

Ps Static pressure = $P_t - P_v$ (inches of water column)

Pt Total pressure (inches of water column)

Pv Velocity pressure (inches of water column)

fpm Velocity of air stream in Feet per Minute

MODEL XG-5500DD

Supply Square and Rectangular Louvered Face - Aluminum/Series XG-5500DD (DDI)

Insulated Non-Insulated

XG-5500DDI-6 - T-bar Lay-in

XG-5500DD-6 - T-bar Lay-in

XG-5500DDI-9 - Donn Finline

XG-5500DD-9 - Donn Finline

Air Outlets shall be model XG-5500DDI (insulated) or XG-5500DD (non-insulated) manufactured by GREENHECK. Units shall be square face ceiling supply diffusers and shall have a factory attached back. Back pan must be of sufficient height to allow center tile (by the ceiling system manufacturer) to be installed from the diffuser face without disassembling the face from the back pan. Devices without back pan attached to the diffuser face will not be allowed.

The units shall be the size and quantity as outline in the plans and specifications. Diffuser shall be one through four slots. The diffuser shall be designed to integrate with the ceiling type. It shall have horizontal deflection surfaces on the fixed pattern control blades which provide a horizontal ceiling pattern with a twenty degree cooling temperature differential at twenty percent of design volume.

Return Square and Rectangular Louvered Face - Aluminum/Series XG-5500 DDR

Non-Insulated

XG-5500 DDR-6 - T-bar Lay-in

XG-5500 DDR-9 - Donn Finline

Air Inlets shall be model XG-5500DD manufactured by GREENHECK. Units shall be square face ceiling return or exhaust diffusers and shall have a factory attached light shield. Light shield must be of sufficient height to allow center tile (by the ceiling system manufacturer) to be installed from the diffuser face without disassembling the face from the back pan. Devices without light shield attached to the diffuser face will not be allowed. The units shall be the size and quantity as outline in the plans and specifications. Diffuser shall be one through four slots. The diffuser shall be designed to integrate with the ceiling type. Face shall have fixed louvers designed to match the appearance of the supply unit.

Round Neck Optional Dampers and Accessories

Butterfly Damper

GREENHECK model XG-BDS aluminum round butterfly type dampers shall be provided. Damper shall consist of two butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Opposed Blade Damper

GREENHECK model XG-D3 aluminum or XG-SD3 Steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Equalizing Grid

GREENHECK model XG-G3 aluminum round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame.

Performance Specification

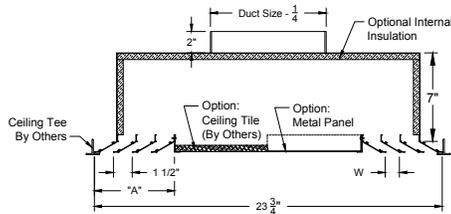

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006.

PERFORMANCE NOTES FOR SERIES XG-5500DD

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

Throw Throw distance in feet at terminal velocities of 150fpm, 100fpm and 50fpm

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10⁻¹² watts minus a 10dB room attenuation in all octave bands

Ps Static pressure = Pt-Pv (inches of water column)

Pt Total pressure (inches of water column)

Pv Velocity pressure (inches of water column)

fpm Velocity of air stream in Feet per Minute. To determine total pressure for other inlet sizes, divide the CFM by the sq footage of the inlet size (chart above). The result is the duct velocity in fpm. From the Pv chart, determine the Pv and add it to the Ps shown in the performance chart to determine the Pt

Air Outlets shall be model XG-9000 manufactured by GREENHECK. Units shall consist of an adjustable set of modular core pattern controllers that are removable from the face of the outlet without the use of tools. Outlets shall be extruded aluminum construction. Steel border or cores are not acceptable.

The units shall be the size and quantity as outline in the plans and specifications.

Outlets shall field adjustable to obtain 1, 2-way opposite, 2-way corner, 3, and 4-way directional air patterns. Units shall be designed to integrate into the specified ceiling system.

Accessories

Optional Dampers

Aluminum opposed blade dampers shall be provided. Damper shall be adjusted using a handle accessible through the face of the diffuser.

Screwdriver slot operators are not allowed.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

PERFORMANCE NOTES FOR SERIES XG-9000/XG-9000S

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute

fpm Velocity of air stream in Feet per Minute

Pt Total pressure (inches of water column)

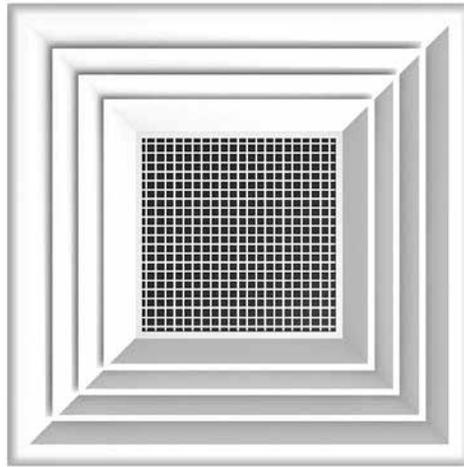

Throw Horizontal distances in feet to the terminal velocity of 150, 100 and 50 fpm

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10⁻¹² watts minus a 10dB room attenuation in all octave bands

CONCENTRIC SUPPLY / RETURN CEILING DIFFUSER

CEILING
DIFFUSERS

CONCENTRIC SUPPLY / RETURN
CEILING DIFFUSER

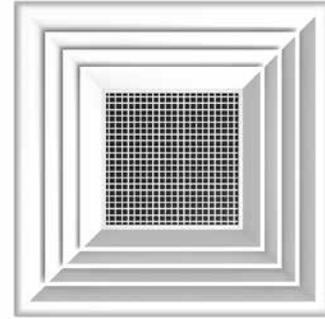

Model XG-DAF-CC5 Supply/Return Ceiling diffusers provide a functional solution to Roof-Top package single outlet air distribution requirements. The louver faced high induction design ensures a true horizontal air pattern for excellent mixing of room and primary air.

The cube core return provides an integrated air return path which minimizes pressure drop and resultant noise levels.

PAGE 87

XG-DAF-CC5

MODEL XG-5500 XG-DAF-C5

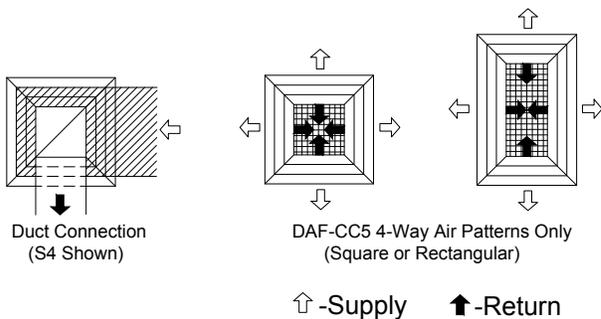

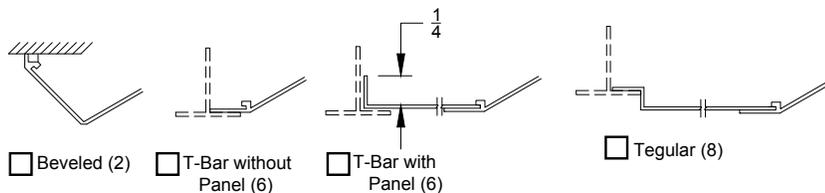

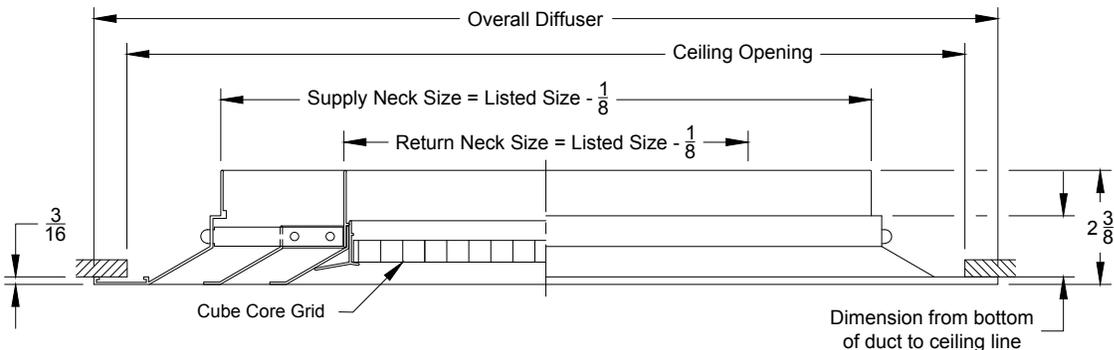

- XG-5500 XG-DAF-CC5-1 - Surface Mount
- XG-5500 XG-DAF-CC5-2 - V-Beveled Drop Face
- XG-5500 XG-DAF-CC5-4 - Deep Drop Frame
- XG-5500 XG-DAF-CC5-6 - T-bar Lay-in
- XG-5500 XG-DAF-CC5-7 - Concealed Spline
- XG-5500 XG-DAF-CC5-8 - Tegular Lay-in

Combination concentric supply/return units shall be model XG-DAF-CC5 manufactured by GREENHECK. Units shall consist of a fixed pattern outer ring of louvers that discharge supply air. The inner return or exhaust core shall consist of aluminum 1/2" x 1/2" x 1/2" cubed core.

Units shall be designed to integrate into the specified ceiling system.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

8	T-Bar Spacing - 1/4	T-Bar Module Size	1 15/16

SERIES XG-DAF-CC5 SPECIFICATIONS

Air Diffusers shall be model:

XG-DAF-CC5-1	Surface Mount
XG-DAF-CC5-2	Beveled Drop Face
XG-DAF-CC5-6	T-bar Lay-in
XG-DAF-CC5-7	Concealed Spline
XG-DAF-CC5-8	Tegular Lay-in

- Combination concentric supply/return units shall be model XG-DAF-CC5 manufactured by GREENHECK. Units shall consist of a fixed pattern outer ring of louvers that discharge supply air. The inner return or exhaust core shall consist of aluminum 1/2" x 1/2" x 1/2" cubed core.
- Units shall be designed to integrate into the specified ceiling system.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70-2006.

Paint Specification

Process shall be anodic electro-deposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

PERFORMANCE NOTES FOR SERIES XG-DAF-CC5

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (Air)

fpm Velocity of air stream in Feet per Minute

Pv Velocity pressure (inches of water column)

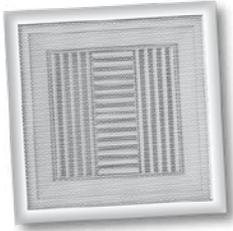

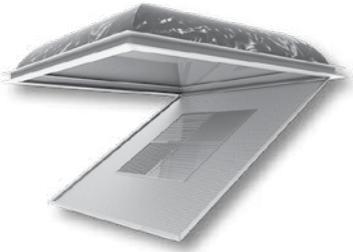

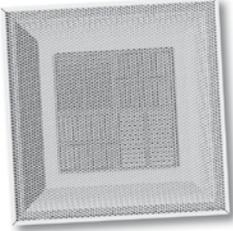

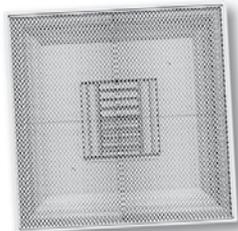

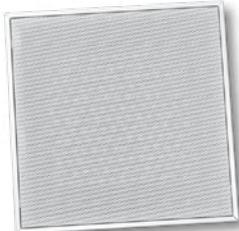

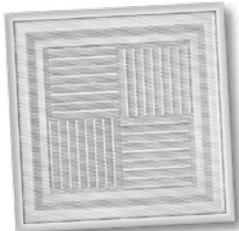

Pt Total pressure (inches of water column)

Ps Static pressure = Pt-Pv (inches of water column)

Throw Cataloged Throw is horizontal distances in feet to the terminal velocities of 150 and 50fpm with ambient supply air temperature

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10^{-12} watts minus a 10dB room attenuation in all octave bands

PERFORATED CEILING DIFFUSERS

<p>MODEL XG-7000</p> 	<p>MODEL XG-PRTB AND XG-SPRTB</p> 	<p>MODEL XG-7300</p> 
<p>MODEL XG-7350</p> 	<p>MODEL XG-7500 AND XG-7550</p> 	<p>MODEL XG-7600 AND XG-7650</p> 
<p>MODEL XG-7550R-F AND XG-7650R-F</p> 		<p>MODEL XG-7900 AND XG-7950</p> 

Model XG-7000 is designed for use in most types of ceilings for efficient, draft free air distribution. It is ideal for applications requiring a variety of air diffusion configurations, corrosion resistant construction, and square or rectangular face and neck size combinations. Five interchangeable air pattern controllers with individually adjustable curved blades provide full vertical to horizontal air pattern capability. Six frame styles and a large selection of square and rectangular frames and neck sizes make the XG-7000 easy to specify for new or existing buildings. Matching returns are available (Model XG-7000R).

PAGE 103

Model XG-PRTB and XG-SPRTB are an economical choice for non-ducted plenum return application. They are shipped without pattern controllers and are for a T-Bar Grid System.

PAGE 116

Model XG-7300 has a round black air pattern control disc permanently attached to the inside center of a steel perforated face and a 1" thick plenum of molded fiberglass with an external layer of aluminum foil. The disc provides a 360° horizontal air pattern. The 7300 is recommended in locations where more specific air patterns are not required and the room configuration is not likely to change.

PAGE 119

Model XG-7350 is furnished with an extruded aluminum frame to accommodate hinging of the steel perforated face. Four air pattern controllers are centrally pivoted to the inside of the face. Each pattern controller can be rotated 360° to achieve 1, 2, 3 or 4-way air pattern even after the diffuser is installed. The diffuser also features a 1" thick plenum of molded fiberglass with an external layer of aluminum foil.

PAGE 122

Model XG-7500 and XG-7550 are designed for use in ceiling applications which call for air pattern adjustability in the field. The perforated face is hinged to swing open to permit easy access to four air pattern controllers centrally pivoted on the inside face surface. These units are available in both steel and aluminum construction and are also available in round neck, XG-7500, or square neck, 7550. Matching returns are available (Model XG-7500R and Model XG-7550R).

PAGE 125

Model XG-7600 and XG-7650 are available in both steel and aluminum construction. The hinged fully removable face allows access to the curve blade pattern controllers mounted in the neck of the diffuser. These units are available in both round neck, XG-7600, and square neck, XG-7650. Matching returns are available (Model XG-7600R and Model XG-7650R).

PAGE 138

Model XG-7550R-F and XG-7650R-F are perforated return filter diffusers designed to be installed in standard T-Bar ceiling grids. The hinged perforated face allows access to the filter (by others). These units are available with a 1" or 2" filter rack.

PAGE 158

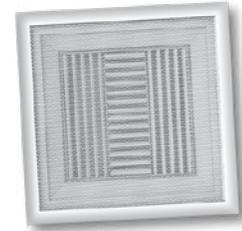

Model XG-7900 and XG-7950 are designed for supply air distribution in applications where air pattern adjustment is desired. The perforated face of the diffuser is secured with spring clips, which allows for easy removal and access to the cores. The modular cores are spring loaded and can be arranged in the diffuser frame before or after installation without the use of tools and without removing the diffuser from the ceiling. These units are available in square neck model XG-7950.

XG-7000-7 - Concealed Spline
XG-7000-8 - Tegular T-bar
XG-7500-9 - Donn Finline

Air Outlets shall be aluminum model XG-7000 manufactured by GREENHECK. Units shall consist of aluminum 51% free area perforated face and an aluminum border and backpan. Perforated holes shall be 3/16" diameter on 1/4" staggered centers.

Outer border of units shall be extruded aluminum construction. The perforated face shall be removable allowing access to aluminum curved blade pattern controller mounted into the neck of the diffusers. Face shall be secured in place with tension spring clips.

Pattern controller blades shall be individually adjustable and allow the discharge pattern to be adjustable from vertical to horizontal. Pattern controller blades shall pivot in friction mounted retainers. Retainers shall hold the deflector blade position throughout the specified operating range of the device. Metal friction wires are not acceptable.

Outlets shall be available in 1, 2-way opposite, 2-way corner, 3, and 4-way directional air patterns. Units shall have square inlets. The units shall be the size and quantity as outline in the plans and specifications.

Units shall be designed to integrate into the specified ceiling system.

Return/Exhaust – Perforated Face – Square Neck/Series XG-7000

XG-7000R-1 - Surface Mounted
XG-7000R-6 - T-bar Lay-in
XG-7000R-7 - Concealed Spline
XG-7000R-8 - Tegular T-bar
XG-7500R-9 - Donn Finline

Air Inlets shall be aluminum model XG-7000R manufactured by GREENHECK. Units shall consist of aluminum 51% free area perforated face and an aluminum border and backpan. Perforated holes shall be 3/16" diameter on 1/4" staggered centers. Units shall be designed for use in ducted return or exhaust applications.

Outer border of units shall be extruded aluminum construction. The perforated face shall be removable allowing access to interior of diffuser. Face shall be secured in place with tension spring clips.

The units shall be the size and quantity as outline in the plans and specifications. Units shall be designed to integrate into the specified ceiling system.

Square Neck Options and Accessories:

Round Neck Optional Dampers and Accessories:

Square to Round Transitions

Units to have square to round transitions allowing installation with round ductwork.

Butterfly Damper

GREENHECK model XG-BDS aluminum round butterfly type dampers shall be provided. Damper shall consist of two butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be accessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be accessed through the face of the diffuser.

Opposed Blade Damper

GREENHECK model XG-D3 aluminum or XG-SD3 steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be accessed through the face of the diffuser.

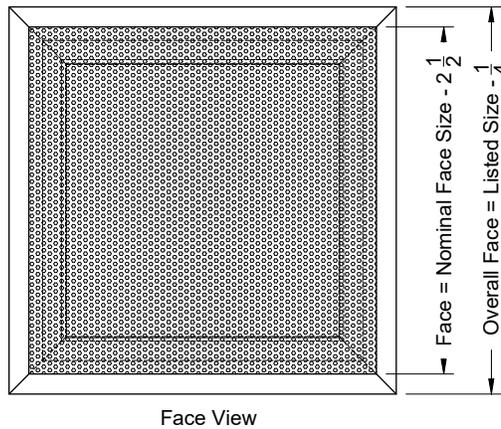

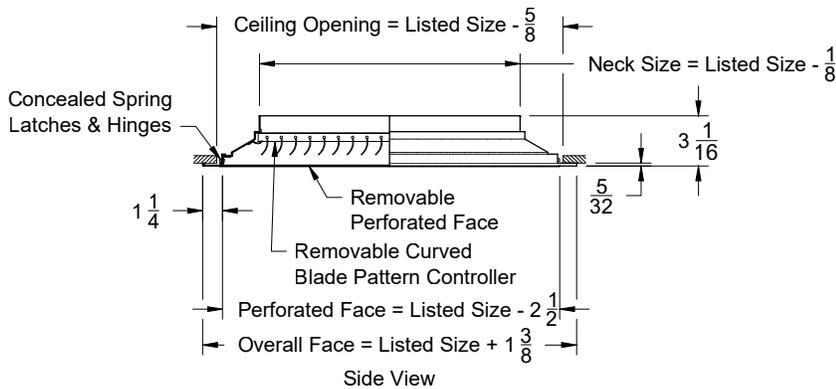

Equalizing Grid

GREENHECK model XG-G3 aluminum round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame.

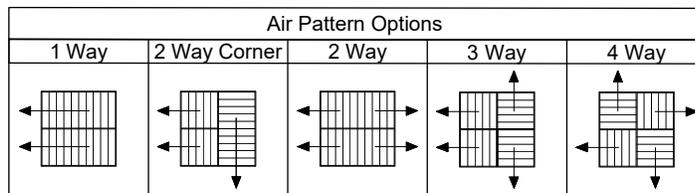

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

XG-7000/XG-7000R

PERFORMANCE NOTES FOR SERIES XG7000

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

fpm Velocity of air stream in Feet per Minute

Pv Velocity pressure (inches of water column)

Pt Total pressure (inches of water column)

Ps Static pressure = $P_t - P_v$ (inches of water column)

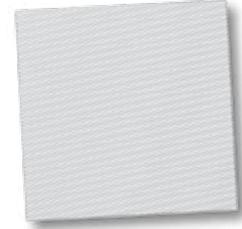

Throw Cataloged throw is horizontal distances in feet to the terminal velocities of 150, 100 and 50fpm with supply air temp 20° F below room air temp

NC Noise criteria, sound pressure level NC ratings are based on sound power level (Lw)
re: 10^{-12} watts minus a 10dB room attenuation in all octave bands

MODEL XG-PRTB/XG-SPRTB

Return or Exhaust - Perforated Face Only - Non Ducted/ Series XG-PRTB Aluminum Steel

- XG-PRTB-6 - T-bar Lay-in
- XG-SPRTB-6 - T-bar Lay-in
- XG-PRTB-8 - Tegular T-bar
- XG-SPRTB-8 - Tegular T-bar
- XG-PRTB-9 - Donn Finline
- SPRTB-9 - Donn Finline

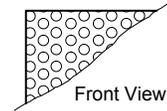

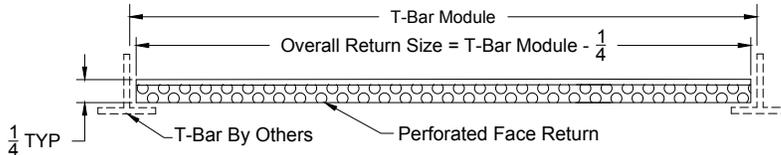

Air Inlets shall be aluminum model XG-PRTB or steel XG-SPRTB manufactured by GREENHECK. Units shall be designed for use in a non- duct return or exhaust applications. Units shall consist of a 51% free area perforated face. Perforated holes shall be 3/16" diameter on 1/4" staggered centers.

The units shall be the size and quantity as outline in the plans and specifications. Units shall be designed to integrate into the specified ceiling system.

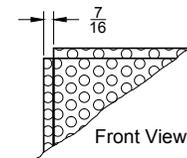

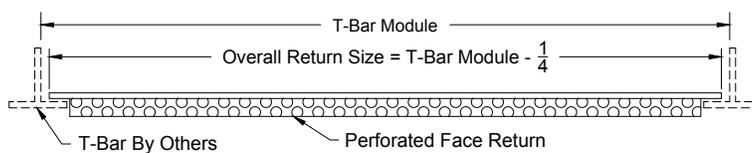

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

Models: XG-PRTB-6 and XG-SPRTB-6 (Lay in T-Bar)

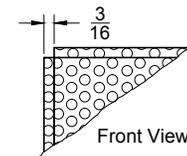

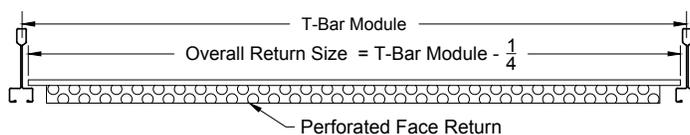

Models: XG-PRTB-8 and XG-SPRTB-8 (Tegular T-Bar)

Perforated Face Return
3/16 Diameter Holes ON
1/4 Staggered Centers

Models: XG-PRTB-9 and XG-SPRTB-9 (Donn Finline Ceiling Grid)

Available Sizes (Width x Height)

MODEL XG-7300

**Supply - Perforated Face -
Integral Fiberglass Backpan -
Fixed Deflector Fixed Steel Face Fixed Aluminum Face**

**XG-7300-6 - Surface Mounted
XG-7300-6 AF - Surface Mounted**

Air Outlets shall be aluminum face model XG-7300 or steel face model XG-7300 AF manufactured by GREENHECK. Units shall consist of 51% free area perforated face fixed to a formed fiberglass backpan. Exposed fiberglass backpan shall have an aluminum foil liner. The outlet's backpan shall be factory scored to allow field installation of a tab lock collar or spin-in fittings.

Perforated holes shall be 3/16" diameter on 1/4" staggered centers.

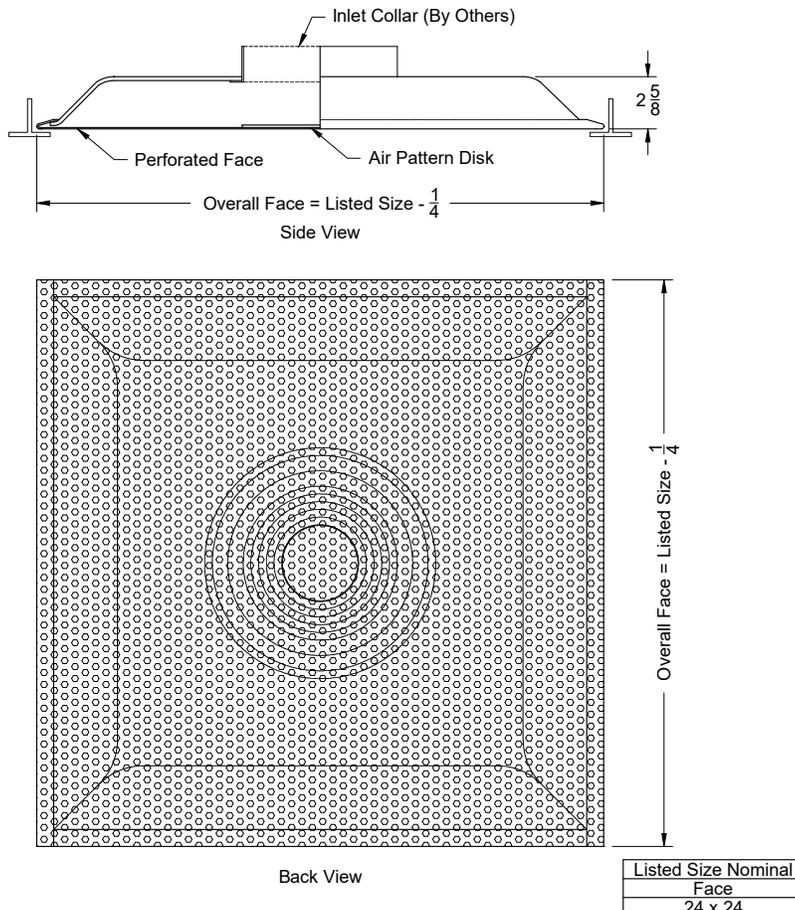

Unit shall generate a 360° horizontal pattern with a fixed round pattern disk mounted on the inside face of the perforated face. The units shall be the size and quantity as outline in the plans and specifications.

Units shall be designed to integrate into the specified ceiling system.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

- XG-7500R-9 AF - Donn Finline Aluminum Face**

Air Outlets shall be model XG-7500R in steel, XG-7500R-AL aluminum, XG-7500R-AF with aluminum face or XG-7500R-DF with a dropped face manufactured by GREENHECK.

Units shall consist of a 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. Units shall be designed for use in ducted return or exhaust applications.

The perforated face shall be hinged allowing access to the inside of the backpan. Face shall be secured in place with tension spring clips. The units shall be the size and quantity as outlined in the plans and specifications.

Units shall be designed to integrate into the specified ceiling system.

Optional Dampers and Accessories

Butterfly Damper

GREENHECK model XG-BDS aluminum round butterfly type dampers shall be provided. Damper shall consist of two butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screwdriver slot that can be assessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screwdriver slot that can be assessed through the face of the diffuser.

Opposed Blade Damper

GREENHECK model XG-D3 aluminum or XG-SD3 steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screwdriver slot that can be assessed through the face of the diffuser.

Equalizing Grid

GREENHECK model XG-G3 aluminum, round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

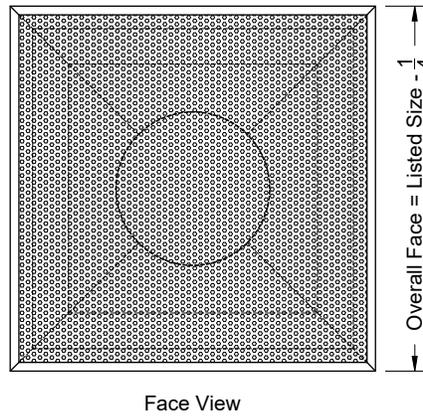

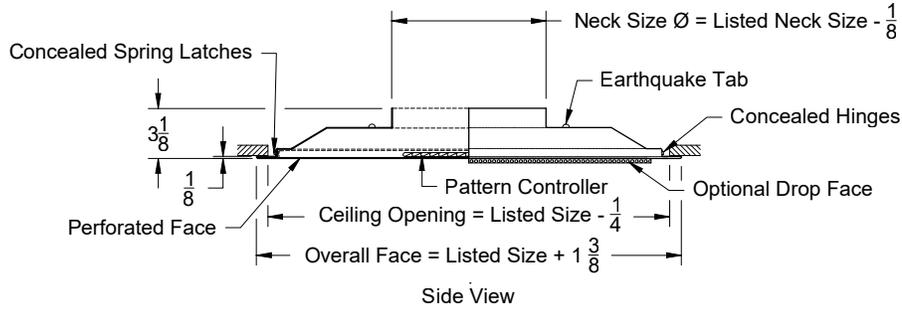

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

**Perforated Diffuser - Square Neck -
Adjustable Face Mounted Pattern Controller**

Supply – Model XG-7550

XG-7550-1 - Surface Mount Steel

XG-7550-1 AF - Surface Mount Aluminum Face

XG-7550-1 DF - Surface Mount Drop Face

XG-7550-6 - T-bar Lay-in Steel

XG-7550-6 AL - T-bar Lay-in Aluminum

XG-7550-6 AF - T-bar Lay-in Aluminum Face

XG-7550-8 - Tegular T-bar Steel

XG-7550-8 AL - Tegular T-bar Aluminum

XG-7550-8 AF - Tegular T-bar Aluminum Face

XG-7550-9 - Donn Finline Steel

XG-7550-9 AF- Donn Finline Aluminum Face

Air Outlets shall be model XG-7550 in steel, XG-7550-AL aluminum, XG-7550-AF with aluminum face or XG-7550-DF with a dropped face manufactured by GREENHECK.

Units shall consist of 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. The perforated face shall be hinged allowing access to four adjustable pattern controllers mounted onto the inside face of the outlet. Face shall be secured in place with tension spring clips. Pattern controller blades shall be individually adjustable and allow the discharge pattern to be adjustable from vertical to horizontal.

Outlets shall be field adjustable allowing 1, 2-way opposite, 2-way corner, 3, and 4-way directional air patterns. The units shall be the size and quantity as outlined in the plans and specifications.

Units shall be designed to integrate into the specified ceiling system.

XG-7550R-8 AF - Tegular T-bar Aluminum Face

XG-7550R-9 - Donn Finline Steel

XG-7550R-9 AF - Donn Finline Aluminum Face

Air Outlets shall be model XG-7550R in steel, XG-7550R-AL aluminum, XG-7550R-AF with aluminum face or XG-7550R-DF with a dropped face manufactured by GREENHECK.

Units shall consist of a 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. Units shall be designed for use in ducted return or exhaust applications.

The perforated face shall be hinged allowing access to the inside of the backpan. Face shall be secured in place with tension spring clips.

The units shall be the size and quantity as outlined in the plans and specifications. Units shall be designed to integrate into the specified ceiling system.

Square Neck Options and Accessories

Opposed Blade Damper

GREENHECK model XG-OBDA aluminum or XG-OBD steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screwdriver slot accessible by opening the face of the diffuser.

Equalizing Grid

GREENHECK model XG-L9 aluminum square equalizing grid shall be provided. Equalizing grid shall consist aluminum blades mounting in an aluminum frame.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

PERFORMANCE NOTES FOR SERIES XG-7550R

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet Per Minute (air)

Nk Vel Neck Velocity of air stream in Feet Per Minute

Ps Negative Static Pressure (inches of water column)

NC Noise criterion, sound pressure level. NC ratings are based on sound power level (Lw) re: 10E-12 watts minus a 10dB room attenuation in all octave bands.

Air Outlets shall be model XG-7600 in steel, XG-7600-AL aluminum, XG-7600-AF with aluminum face or XG-7600-DF with a dropped face manufactured by GREENHECK.

Units shall consist of a 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. The perforated face shall be removable allowing access to the neck mounted aluminum curved blade pattern controllers with tension spring clips. Pattern controller blades shall be individually adjustable and allow the discharge pattern to be adjustable from vertical to horizontal. Pattern controller blades shall pivot in adjustable from vertical to horizontal.

Pattern controller blades shall pivot in friction mounting retainers. Retainers shall hold the deflector blade position throughout the specified operating range of the device. Metal friction wires are not acceptable. Outlets shall be available in 1, 2-way opposite, 2-way corner, 3, and 4-way directional air patterns. The units shall be the size and quality as outlined in the plans and specifications. Units shall be designed to integrate into the specified ceiling systems.

XG-7600R-9 - Donn Finline Steel

XG-7600R-9 AF - Donn Finline Aluminum Face

Air Outlets shall be model XG-7600R in steel, XG-7600R-AL aluminum, XG-7600R-AF with aluminum face or XG-7600R-DF with a dropped face manufactured by GREENHECK.

Units shall consist of aluminum 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. Units shall be designed for use in ducted return or exhaust applications. The perforated face shall be hinged allowing access to the inside of the backpan. Face shall be secured in place with tension spring clips.

The units shall be the size and quality as outlined in the plans and specifications. Units shall be designed to integrate into the specified ceiling systems.

Optional Dampers and Accessories:

Square to Round Transitions

Units to have square to round transitions allowing installation with round ductwork.

Butterfly Damper

GREENHECK model XG-BDS aluminum, round butterfly type dampers shall be provided. Damper shall consist of two butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screwdriver slot that can be assessed through the face of the diffuser.

Opposed Blade Damper

GREENHECK model XG-D3 aluminum or XG-SD3 steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Equalizing Grid

GREENHECK model XG-G3 aluminum, round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 1991.

**Perforated Diffuser - Square Neck -
Adjustable Neck Mounted Pattern Controller**

Supply – Model XG-7650

XG-7650-1 - Surface Mount Steel

XG-7650-1 AF - Surface Mount Aluminum Face

XG-7650-1 DF - Surface Mount Drop Face

XG-7650-6 - T-bar Lay-in Steel

XG-7650-6 AL - T-bar Lay-in Aluminum

XG-7650-6 AF - T-bar Lay-in Aluminum Face

XG-7650-8 - Tegular T-bar Steel

XG-7650-8 AL - Tegular T-bar Aluminum

XG-7650-8 AF - Tegular T-bar Aluminum Face

XG-7650-9 - Donn Finline Steel

XG-7650-9 AF- Donn Finline Aluminum Face

Air Outlets shall be model XG-7650 in steel, XG-7650-AL aluminum, XG-7650-AF with aluminum face or XG-7650-DF with a dropped face manufactured by GREENHECK.

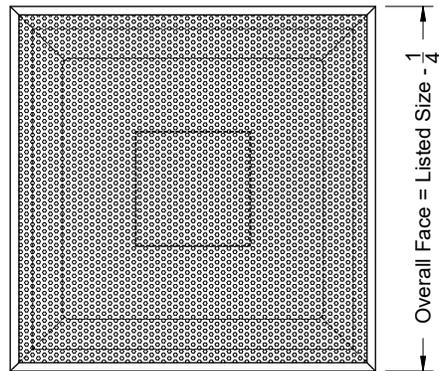

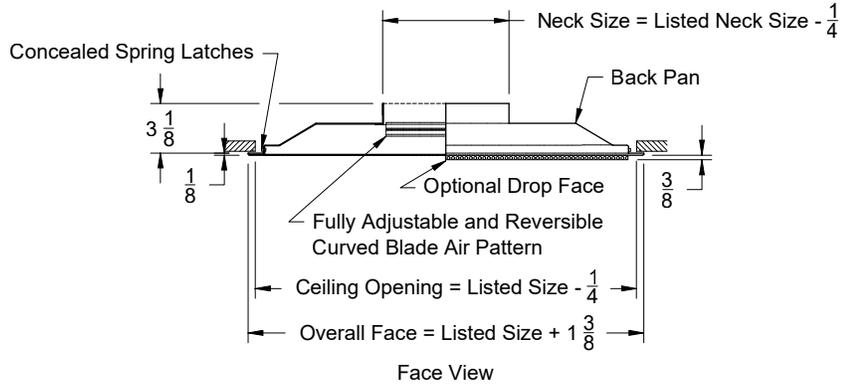

Units shall consist of a 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. The perforated face shall be removable allowing access to aluminum, curved blade pattern controllers mounted into the neck of the diffusers. Face shall be secured in place with tension spring clips. Pattern controllers shall be individually adjustable and allow the discharge pattern to be adjustable from vertical to horizontal. Pattern controller blades shall pivot in friction mounting retainers. Retainers shall hold the deflector blade position throughout the specified operating range of the device. Metal friction wires are not acceptable.

Outlets shall be available in 1-way, 2-way opposite, 2-way corner, 3-way, and 4-way directional air patterns. The units shall be the size and quantity as outlined in the plans and specifications. Units shall be designed to integrate into the specified ceiling system.

XG-7650R-9 AF - Donn Finline Aluminum Face

Air Outlets shall be model XG-7650R in steel, XG-7650R-AL aluminum, XG-7650R-AF with aluminum face or XG-7650R-DF with a dropped face manufactured by GREENHECK.

Units shall consist of a 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. Units shall be designed for use in ducted return or exhaust applications. The perforated face shall be hinged allowing access to the inside of the backpan. Face shall be secured in place with tension spring clips.

The units shall be the size and quantity as outlined in the plans and specifications. Units shall be designed to integrate into the specified ceiling system.

Square Neck Options and Accessories

Opposed Blade Damper

GREENHECK model XG-OBDA aluminum or XG-OBD steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screwdriver slot accessible by opening the face of the diffuser.

Equalizing Grid

GREENHECK model XG-L9 aluminum, square equalizing grid shall be provided. Equalizing grid shall consist aluminum blades mounting in an aluminum frame.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

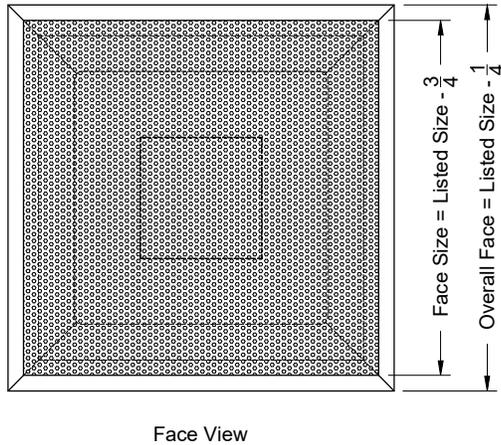

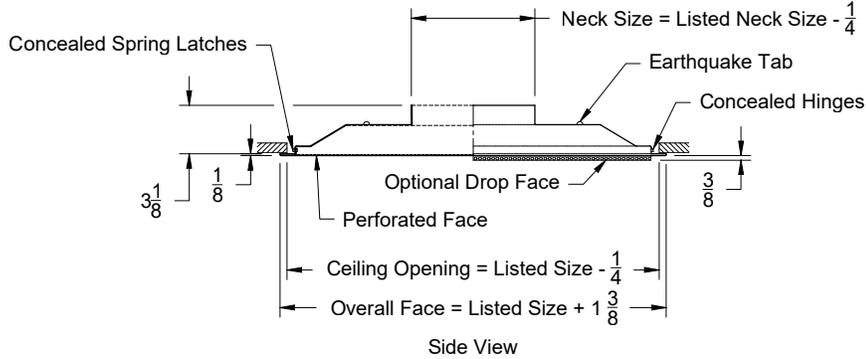

Paint Specification

Process shall be anodic electrodeposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

PERFORMANCE NOTES FOR SERIES XG-7550R-F/XG-7650R-F

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

fpm Velocity of air stream in Feet per Minute

Pv Velocity pressure (inches of water column)

Pt Total pressure (inches of water column)

Ps Static pressure = Pt-Pv (inches of water column)

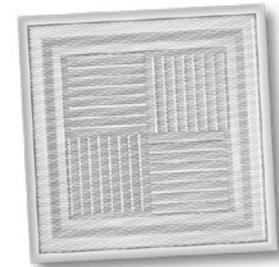

Throw* Non-isothermal horizontal throw (supply air temperature 15°F colder than average room temperature); values are for 150, 100 and 50fpm velocities

Throw Isothermal throw (supply air temperature the same as average room temperature); values are for 150, 100 and 50fpm velocities

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10⁻¹² watts minus a 10dB room attenuation in all octave bands

MODEL XG-7900

Supply - Perforated Modular Core - Extruded Aluminum - Square Neck - 1 to 4 Core/Series XG-7900

Steel

XG-7900-1 - Surface Mounted

XG-7900-8 - Tegular T-bar

XG-7900-6 - T-bar Lay-in

XG-7900-9 - Donn Finline

Air Outlets shall be aluminum model XG-7900 manufactured by GREENHECK. Units shall consist of an aluminum 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. Border of outlet shall be constructed from an aluminum extrusion.

The perforated face shall be removable allowing access to adjustable modular core pattern controllers mounted onto the inside neck of the outlet. Steel modular cores deflectors are not acceptable. Face shall be secured in place with tension spring clips. Outlets shall be field adjustable allowing 1, 2 way opposite, 2 way corner, 3, and 4 way directional air patterns.

The units shall be the size and quantity as outline in the plans and specifications. Units shall be designed to integrate into the specified ceiling system.

Square Neck Options and Accessories

Opposed Blade Damper

GREENHECK model XG-OBDA aluminum and XG-OB steel opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be screw slot operated that can be accessed through the damper of the diffuser.

Equalizing Grid

GREENHECK model XG-L9 aluminum square equalizing grid shall be provided. Equalizing grid shall consist aluminum blades mounting in an aluminum frame.

Round Neck Optional Dampers and Accessories

Square to Round Transitions

Units to have square to round transitions allowing installation with round ductwork.

Butterfly Damper

GREENHECK model XG-BDS aluminum round butterfly type dampers shall be provided. Damper shall consist of two butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Opposed Blade Damper

GREENHECK model XG-D3 aluminum or XG-SD3 steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Equalizing Grid

GREENHECK model XG-G3 aluminum round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

XG-7900

PERFORMANCE NOTES FOR SERIES XG-7900

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet Per Minute (air)

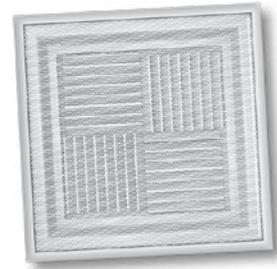

fpm Velocity of air stream in Feet Per Minute

Pt Total pressure (inches of water column)

Throw Non-isothermal horizontal throw (supply air temperature 15°F colder than average room temperature); values are for 150, 100 and 50fpm velocities

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10^{-12} watts minus a 10dB room attenuation in all octave bands

MODEL XG-7950

Supply Diffusers - Perforated Modular Core - Square Neck - 4 Core/Series XG-7950

Steel Aluminum Face - Steel Backpan

XG-7950-1 - Surface Mounted

XG-7950-1 AF - Surface Mounted

XG-7950-1 DF - Surface Mounted-Dropped Face

XG-7950-6 - T-bar Lay-in

XG-7950-8 - Tegular T-bar

XG-7950-9 - Donn Fineline

XG-7950-6 AF - T-bar Lay-in

XG-7950-8 AF - Tegular T-bar

XG-7950-9 AF - Donn Fineline

Air Outlets shall be steel model XG-7950 or aluminum face, steel backpan model XG-7950-AF manufactured by GREENHECK.

Units shall consist of aluminum 51% free area perforated face with 3/16" diameter perforated holes on 1/4" staggered centers. The perforated face shall be hinged allowing access to four adjustable aluminum modular core pattern controllers mounted into the neck of the outlet. Steel modular cores deflectors are not acceptable. Face shall be secured in place with tension spring clips. Outlets shall be field adjustable allowing 1, 2-way opposite, 2-way corner, 3, and 4-way directional air patterns.

The units shall be the size and quantity as outline in the plans and specifications. Units shall be designed to integrate into the specified ceiling system.

Square Neck Options and Accessories

Opposed Blade Damper

GREENHECK model XG-OBDA aluminum or XG- OBD steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a handle accessible by opening the face of the diffuser.

Equalizing Grid

GREENHECK model XG-L9 aluminum square equalizing grid shall be provided. Equalizing grid shall consist aluminum blades mounting in an aluminum frame.

Round Neck Optional Dampers and Accessories:

Square to Round Transitions

Units to have square to round transitions allowing installation with round ductwork.

Butterfly Damper

GREENHECK model XG-BDS aluminum round butterfly type dampers shall be provided. Damper shall consist of two butterfly style blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Radial Shutter Damper

GREENHECK model XG-RSD steel round radial shutter damper shall be provided. Damper shall consist of gang operated radial blades that slide perpendicular to air flow direction. The damper shall be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Opposed Blade Damper

GREENHECK model XG-D3 aluminum or XG-SD3 steel round opposed blade type dampers shall be provided. Damper shall consist of gang operated blades that can be adjusted from full open to full closed. Damper shall be adjusted with a screw driver slot that can be assessed through the face of the diffuser.

Equalizing Grid

GREENHECK model XG-G3 aluminum round equalizing grid shall be provided. Equalizing grid shall consist of 1/2" x 1/2" x 1/2" aluminum cubed core mounting in an aluminum frame.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

PERFORMANCE NOTES FOR SERIES XG-7950

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

fpm Velocity of air stream in Feet per Minute

Pt Total pressure (inches of water column)

Throw Non-isothermal horizontal throw (supply air temperature 15°F colder than average room temperature); values are for 150, 100 and 50fpm velocities

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10^{-12} watts minus a 10dB room attenuation in all octave bands

MODEL XG-3000

MODEL XG-3100

MODEL XG-3200

MODEL XG-5750

Model XG-3000 is a high induction, high capacity 3 cone adjustable diffuser. It is fully adjustable from horizontal to vertical discharge and is aluminum construction.

PAGE 189

Model XG-3100 is a high induction, high capacity 2 cone diffuser. It is available in both aluminum and steel construction. The 3100A can be adjusted for vertical or horizontal discharge.

PAGE 192

Model XG-3200 is an excellent choice for high capacity applications such as factories, gymnasiums, theaters, and convention halls. It can effectively be applied for either spot heating or cooling

PAGE 198

Model XG-R5750 is an architecturally pleasing round diffuser that blends well into the ceiling surface. It is available in all aluminum, aluminum face with steel backpan and steel construction.

PAGE 203

MODEL XG-3000

Air Outlets shall be model XG-3000 manufactured by GREENHECK Diffuser shall be constructed of 3 round inner cones and a round outer cone. Outlet shall be adjustable to allow the discharge pattern to be set from full horizontal to vertical. Units shall be aluminum construction. The units shall be the size and quantity as outline in the plans and specifications.

Pattern adjustment shall be accomplished by rotating the innermost cone. The inner core assembly shall be removable for installation and for access into the ductwork. The center cone shall include an access hole to allow adjustment of an optional damper.

Model XG-3000-1 - Flush Cone

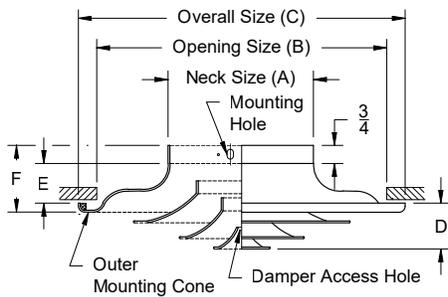

Outlet shall have an outer cone that allows flush mounting to the ceiling opening.

Model XG-3000-2 - Drop Cone

Outlet shall have a dropped outer cone to move the discharge jet away from the ceiling surface. Dropped cone shall minimize ceiling smudging.

Performance Specification

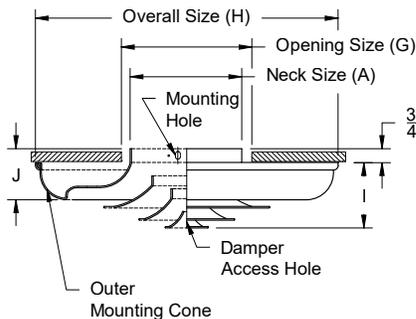

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

PERFORMANCE NOTES FOR SERIES XG-3000

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

- 1 Tabulated radial throw in feet is based on a 9' ceiling height, ambient supply air, MAX Throw @ Vt = 75fpm, MIN Throw @ Vt = 150fpm, and the diffuser inner cones in down position for 360° horizontal air distribution pattern.
- 2 For vertical down protection air pattern with cooling supply air temperature 20° below room temperature and diffuser inner cones in up position: multiply the tabulated radial throw values by a factor of 0.80 to obtain vertical down projection distances at MIN and MAX (Vt) terminal velocities.
- 3 For vertical down projection air pattern with heating supply air temperatures 20° above room temperature and diffuser inner cones in up position: multiply the tabulated radial throw values by a factor of 0.60 to obtain vertical down projection distances at MIN and MAX (Vt) terminal velocities.
- 4 Velocity Pressure (Pv) and Static Pressure (Ps) are in inches of water.
- 5 Series 3000 Diffusers are tested in accordance with ASHRAE 70-2006. Sound data are calculated in accordance with International Standard ISO 3741 comparison method. The NC values are based on a room absorption of 10dB for sound power level (lw) re: 10⁻¹² watts - symbol indicates NC less than 20.
- 6 All data is applicable for exposed for exposed duct mounting or ceiling installation.

MODEL XG-3100

Fixed Round Diffuser - 2 Cone/Series XG-3100

Air outlets shall be model XG-3100 (aluminum) or XG-3100-S (steel) manufactured by GREENHECK Diffuser shall be constructed of 2 round inner cone assembly and a round outer cone. Outlet shall have a fixed horizontal pattern. Units shall be aluminum construction (model XG-3100) or steel construction (model XG-3100S). The units shall be the size and quantity as outline in the plans and specifications.

The inner core assembly shall be removable for installation and for access into the ductwork. The center cone shall include an access hole to allow adjustment of an optional damper.

Flush Cone Model XG-3100-1 - Aluminum Model XG-3100S-1 - Steel

Outlet shall have an outer cone that allows flush mounting to the ceiling opening.

Drop Cone Model XG-3100-2 - Aluminum Model XG-3100-S-2 - Steel

Outlet shall have a dropped outer cone to move the discharge jet away from the ceiling surface. Dropped cone shall minimize ceiling smudging.

Adjustable Round Diffuser - 2 Cone/Series XG-3100A

Air outlets shall be model XG-3100A (aluminum) or XG-3100A-S (steel) manufactured by GREENHECK Diffuser shall be constructed of 2 round inner cone assembly and a round outer cone. Outlet shall be adjustable to allow the discharge pattern to be set from full horizontal to vertical. Units shall be aluminum construction (model XG-3100) or steel construction (model XG-3100S). The units shall be the size and quantity as outline in the plans and specifications.

Pattern adjustment shall be accomplished by rotating the innermost cone. The inner core assembly shall be removable for installation and for access into the ductwork. The center cone shall include an access hole to allow adjustment of an optional damper.

Flush Cone Model XG-3100A-1 - Aluminum Model XG-3100SA-1 - Steel

Outlet shall have an outer cone that allows flush mounting to the ceiling opening.

Drop Cone Model XG-3100A-2 - Aluminum Model XG-3100A-S-2 - Steel

Outlet shall have a dropped outer cone to move the discharge jet away from the ceiling surface. Dropped cone shall minimize ceiling smudging.

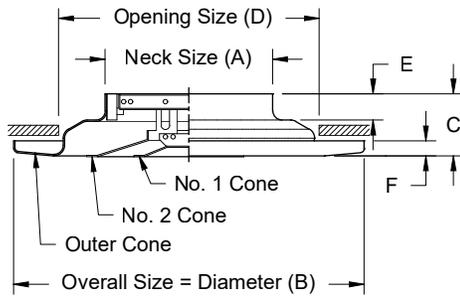

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006

XG-3100

PERFORMANCE NOTES FOR SERIES XG-3100

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

- 1 Tabulated radial throw in feet is based on a 9' ceiling height, ambient supply air, MAX Throw @ $V_t = 75$ fpm, MIN Throw @ $V_t = 150$ fpm, and the diffuser inner cones in down position for 360° horizontal air distribution pattern.
- 2 For vertical down protection air pattern with cooling supply air temperature 20° below room temperature and diffuser inner cones in up position: multiply the tabulated radial throw values by a factor of 0.80 to obtain vertical down projection distances at MIN and MAX (V_t) terminal velocities.
- 3 For vertical down projection air pattern with heating supply air temperatures 20° above room temperature and diffuser inner cones in up position: multiply the tabulated radial throw values by a factor of 0.60 to obtain vertical down projection distances at MIN and MAX (V_t) terminal velocities.
- 4 Velocity Pressure (P_v) and Static Pressure (P_s) are in inches of water.
- 5 Series 3000 Diffusers are tested in accordance with ASHRAE 70-2006. Sound data are calculated in accordance with International Standard ISO 3741 comparison method. The NC values are based on a room absorption of 10dB for sound power level (l_w) re: 10^{-12} watts - symbol indicates NC less than 20.
- 6 All data is applicable for exposed for exposed duct mounting or ceiling installation.

MODEL XG-3200

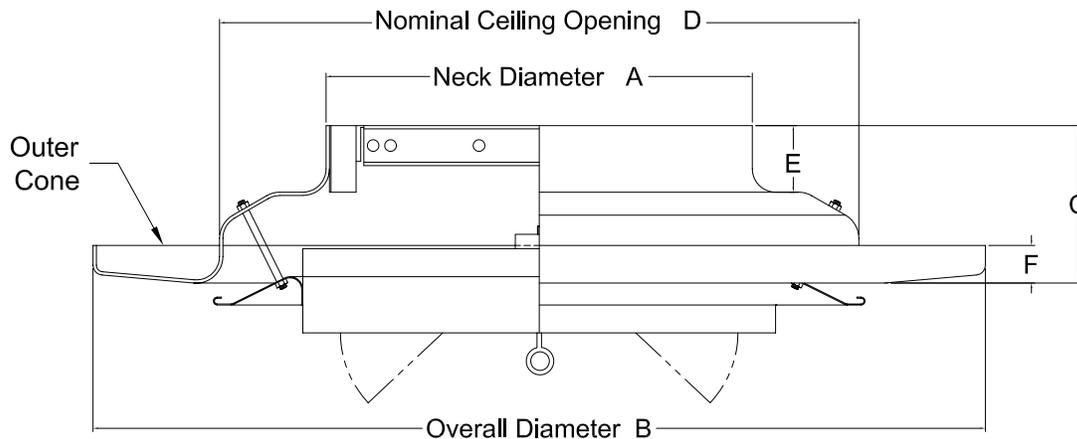

Air outlets shall be model XG-3200 manufactured by GREENHECK Diffusers shall be constructed of an opposed blade damper inner assembly mounted in an inner ring. Outlets shall allow the adjustment of the discharge pattern from full horizontal to full vertical and be adjustable from the face by turning an operator ring. Units shall be steel construction. The units shall be the size and quantity as outline in the plans and specifications.

Pattern adjustment operator shall open the inner opposed blade damper assembly to discharge the air in a vertical pattern or close the damper to allow a tight horizontal pattern. In the horizontal setting, core shall project discharge pattern to minimize ceiling smudging. The inner core assembly shall be removable for installation and for access into the ductwork.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006.

PERFORMANCE NOTES FOR SERIES XG-3200

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM	Cubic Feet per Minute (air)
Horizontal throw	throw distance in feet at terminal velocities of 150fpm, 100fpm and 50fpm.
NC	Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10 ⁻¹² watts minus a 10dB room attenuation in all octave bands
fpm	Velocity of air stream in Feet per Minute
Pv	Velocity pressure (inches of water column)
Pt	Total pressure (inches of water column)
Ps	Static pressure = Pt-Pv (inches of water column)
Throw	Isothermal throw (supply air temperature the same as average room temperature); values are for 150, 100 and 50fpm velocities
Ps -H	static pressure horizontal
Ps-V	static pressure vertical
Pt V	total pressure vertical
Throw H C	throw horizontal cooling
Throw V C	throw vertical cooling
Throw V H	vertical heating

MODEL XG-R5750

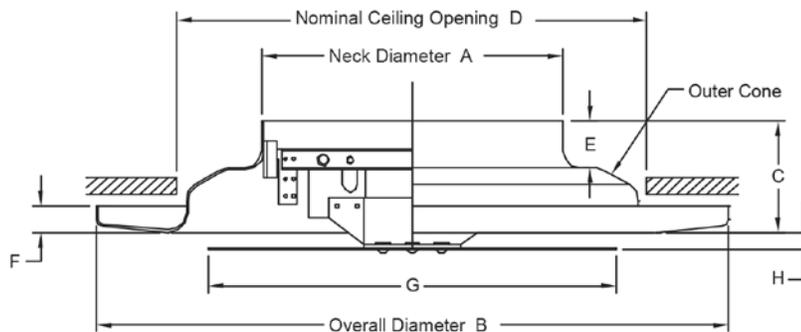

Air outlets shall be model XG-R5750-AL (all aluminum), XG-R5750-AF (aluminum face, steel backpan) or XG-R5750-S (all steel) manufactured by GREENHECK

Diffuser shall be constructed of a round flat face panel and a round outer cone. Outlet shall have a fixed horizontal pattern. The units shall be the size and quantity as outlined in the plans and specifications.

Round face panel shall be removable to allow access to the round outer cone. Outlet shall be designed for surface mounting applications and have an outer cone that allows flush mounting to the ceiling opening.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70- 2006.

XG-R5750

PERFORMANCE NOTES FOR SERIES XG-R5750

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet per Minute (air)

Nk Vel Neck velocity is the airstream velocity in the duct just before it reaches the supply outlet; measured in Feet per Minute

Pv Velocity pressure (inches of water column)

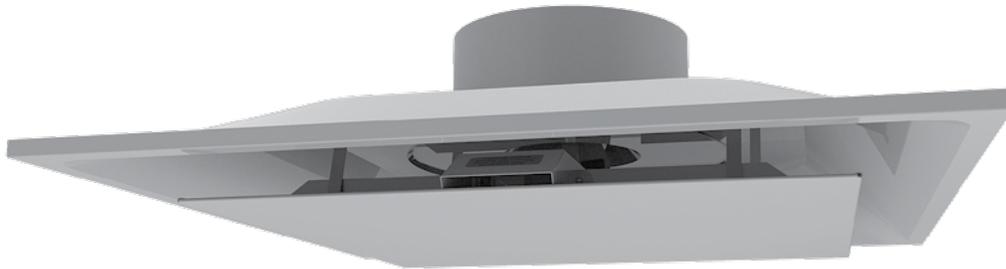

Pt Total pressure (inches of water column)

Ps Static pressure = $Pt - Pv$ (inches of water column)

Throw Isothermal throw (supply air temperature the same as average room temperature); values are for 150, 100 and 50fpm velocities

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10^{-12} watts minus a 10dB room attenuation in all octave bands

VAV DIFFUSERS

The XG-MS series of variable volume diffusers provides both accurate and individual control for heating and cooling without the use of an air terminal unit. By combining the performance of a diffuser with the function of an air terminal unit, VAV control strategies can be employed at a reduced first cost. Better comfort is obtained by the ability to move the zone control to the diffuser level. Aesthetics are not sacrificed with the sleek, plaque-faced look.

Model XG-MS is for cooling only applications. The self-contained thermal controls, mounted just above the plaque, consist of a single sensor and mechanical mechanism to generate the flow controller. PAGE 208

Model XG-MSCVH is for heating and cooling applications. The XG-MSCVH is the same as the XG-MS with three added thermal controllers utilizing input from four thermal sensors. PAGE 208

Model XG-MSEHC is for heating and cooling applications and uses a duct sensor to communicate with a remote mounted thermostat and an electronic motor to operate the modulating device. PAGE 213

MODEL XG-MSC/ XG-MSCVH

The XG-MSC (cooling only) and the XG-MSCVH (heating/cooling) are thermally powered variable volume air diffusers which are completely self-powered and self-contained.

The thermal control actuators are both the room thermostats and the damper motor. To sense the average room temperature, a continuous sample of room air is induced up and around the face panel. A small amount of supply air is diverted through an orifice against an induction wing then back into the primary air path, creating just enough negative pressure to induce a sample of secondary room air around the edge of the face panel, through the induction trough and across the thermal actuators. The diffusion damper is mechanically opened and closed by the thermal actuators to vary the flow of warm/cool air into the space.

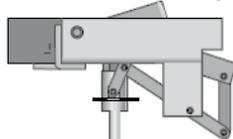

- Each thermal actuator is a precisely calibrated thermostat
- Thermal control actuators allow heat energy to transform into mechanical energy through the movement of a stainless steel piston
- The thermal actuator is a small brass cylinder containing petroleum based wax. The wax expands when heated, driving the piston out. A torsion spring returns the piston as the wax cools and retracts
- Thermal actuators are used in a variety of thermostatic applications. Typical applications include automotive controls, aerospace, marine, medical and many more

VAV room temperature cooling control. Room air is induced past a thermal actuator, which then adjusts airflow based on space requirements. The actuator is mechanical and requires no electrical or pneumatic connectors.

Note:

Units are equipped with a non-adjustable warm-up cycle control function. When the supply air temperature is above 72 degrees F., the disc will be open. At start-up, when the supply temperature maybe warm, the disc will open regardless of the room temperature. When cool air is supplied, the disc will close but only if the room is below the setting.

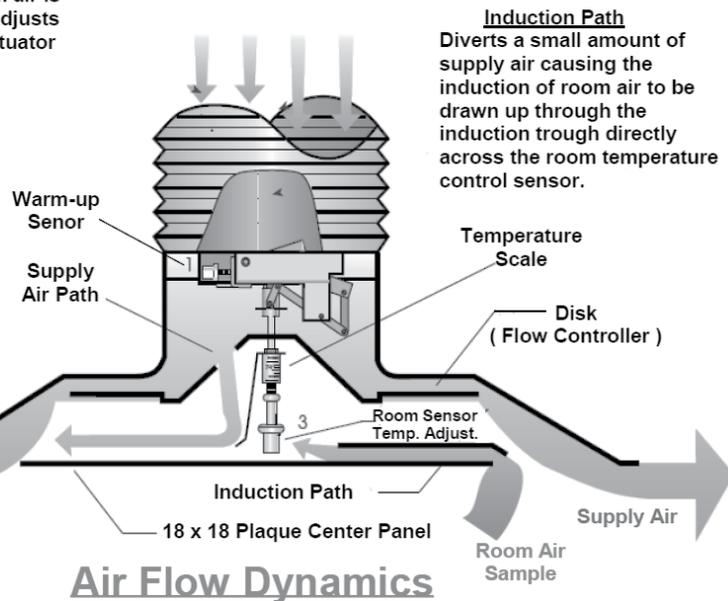

Actuator Assembly

3
Room Sensor
Temp. Adjust

Temperature Adjustment:

Factory set-point approximately 74 degrees. For cooler room temperature, turn room actuator clockwise. For warmer room temperature, turn room actuator counter-clockwise. Determine room temperature set-point by aligning end of actuator with the indicators on the temperature scale. Each full rotation for each indicator on the temperature scale equals plus or minus 2 degrees. For 74 degree factory set-point, turn actuator clockwise until it stops, then turn counter-clockwise 3 full turns.

Air Flow Dynamics

Operation

Change over between heating and cooling modes is determined by supply air temperature. When heating cycle is initiated, element # ① will react first, lowering damper to full open position (full heating).

Then element # ②, the heating slave, reacts at 78 degrees or greater, posing the heating u-arm to engage element # ③, the room thermostat for heating control.

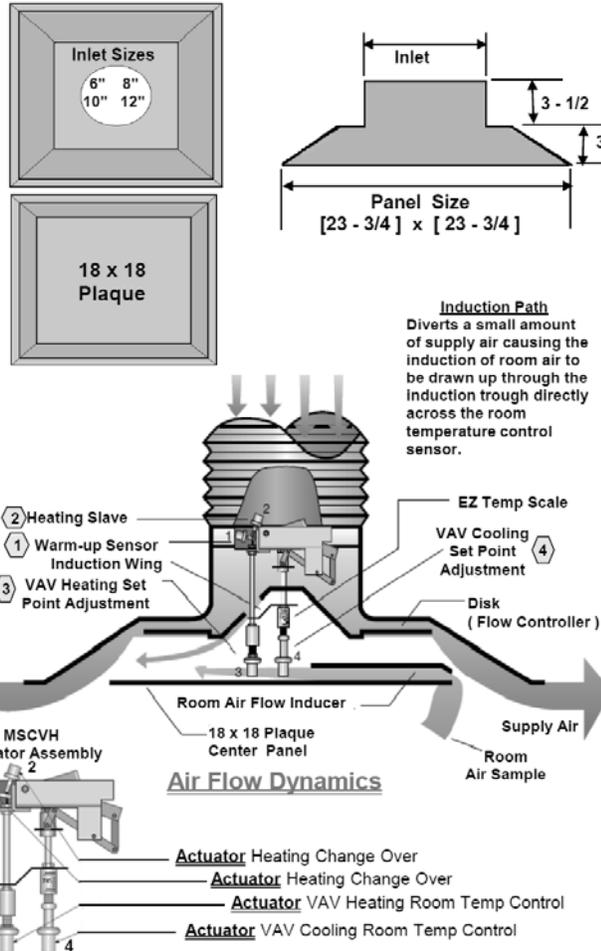

As the room warms, element # ③ begins to sense room temperature to vary the heating supply volume to achieve and sustain the desired room temperature. The factory set point of 74 degrees is adjustable between 72 - 78 degrees. For less heating, turn element # ③ clockwise. For more heating turn element # ③ counter-clockwise. Each full turn will equal plus or minus 2 degrees. A drop in room temperature and unit will respond by opening to increase heating volume until the room temperature reaches the desired set point.

VAV Cooling control is initiated when supply air is below 68 degrees.

In cooling mode elements # ① & # ②, do not react. This engages the cooling control element # ④ which will vary the supply air when cooling. A rise in room temperature and the unit will respond by allowing cool air into the space until the room temperature reaches the desired set point. All units are factory set at 74 degrees, and are adjustable between 72 and 78 degrees. For a cooler room temperature turn element # ④ clockwise. For a warmer room temperature turn element # ④ counter-clockwise.

Determine room temperature set point by aligning the end of the element with the indicators on the temperature scale. Each full turn or indicator will equal plus or minus 2 degrees.

Induction Room air is induced across elements # ③ and # ④ by use of a simple induction wing. This diverts a small amount of supply air which induces a room air sample through trough located on the back side of the appearance panel.

MODEL XG-MSC/ XG-MSCVH

Air Diffusers shall be model:

Cooling Only

XG-MSC-1 Surface Mount

XG-MSC-6 T-bar Lay-in

XG-MSC-8 Tegular Lay-in

XG-MSC-9 Donn Finline / Bolt Slot

Heating and Cooling

XG-MSCVH-1 Surface Mount

XG- MSCVH-6 T-bar Lay-in

XG-MSCVH-8 Tegular Lay-in

XG-MSCVH-9 Donn Finline / Bolt Slot

Units shall be manufactured by GREENHECK and be of steel construction. Units shall be square with a formed backpan and a flat face panel. The face panel shall project no more than 1/4" below the ceiling grid or surface. The diffuser shall have the same appearance from the face regardless of the inlet size. Each diffuser damper shall consist of an aluminum extruded disc to provide a variable unobstructed 360° horizontal discharge for maximum Coanda effect and superior induction. All diffusers shall have a temperature adjustment scale with indicators that range from 70° 78°F. The initial set point shall be factory set at 74°F. No tools shall be required.

Model XG-MSC cooling diffuser shall utilize one thermal actuator to provide VAV room temperature control for cooling.

Model XG-MSCVH heating and cooling diffuser shall utilize four thermal actuators to provide both heating and cooling control. The diffuser is equipped with two room temperature-sensing thermal actuators and two heating change-over thermal actuators. The room temperature settings for heating and cooling shall be separately adjustable. One room actuator shall sense temperature and vary the supply air when cooling. The second actuator shall sense room temperature and vary the supply air when heating. The heating change-over actuators shall be factory set to engage heating mode when supply air temperature rises above 78°F and will return to cooling mode when supply air temperature falls below 68°F.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70-2006.

Paint Specification

Process shall be anodic electro-deposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

PERFORMANCE NOTES FOR SERIES XG-MSC

All data is tested in accordance with ANSI/ASHRAE 70-2006.

DEFINITION OF UNITS

CFM Cubic Feet Per Minute (air)

fpm Velocity of air stream in Feet Per Minute

Pt Total pressure (inches of water column)

Throw Non-isothermal horizontal throw (supply air temperature 15°F colder than average room temperature); values are for 150, 100 and 50fpm velocities

NC Noise criterion, sound pressure level NC ratings are based on sound power level (Lw) re: 10⁻¹² watts minus a 10dB room attenuation in all octave bands

Ps Static Pressure (inches of water column)

MODEL XG-MSE-HC

Air Diffusers shall be model:
XG-MSE-HC-6 T-bar Lay-in
XG-MSE-HC-8 Tegular Lay-in
XG-MSE-HC-9 Donn Finline / Bolt Slot

Units shall be manufactured by GREENHECK and be of steel construction. Units shall be square with a formed backpan and a flat face panel. The face panel shall project no more than 1/4" below the ceiling grid or surface. The diffuser shall have the same appearance from the face regardless of the inlet size.

The diffuser shall include an integral modulating disk that continually regulates the volume of supply air in response to the wall mounted thermostat. Diffusers dependent on integral air induction ceiling located sensors or set point adjustment methods other than from wall mounted thermostats shall not be acceptable.

To ensure finite control of temperature by modulation, the electric 24Vac actuators shall be a drive-open, drive-closed motor on the electrically driven units. Actuators that incorporate an expanding material which only drives the unit open when subjected to heat causing electrical current, requiring a spring return mechanism to force the diffuser to a closed position shall not be acceptable.

The electronic modulating wall mounted thermostatic control shall be either a 2 to 10Vdc or floating point. All field wiring, materials and labor shall be supplied and installed by others.

Performance Specification

The manufacturer shall provide published performance data. Data shall be tested in accordance to ANSI/ASHRAE Standard 70-2006.

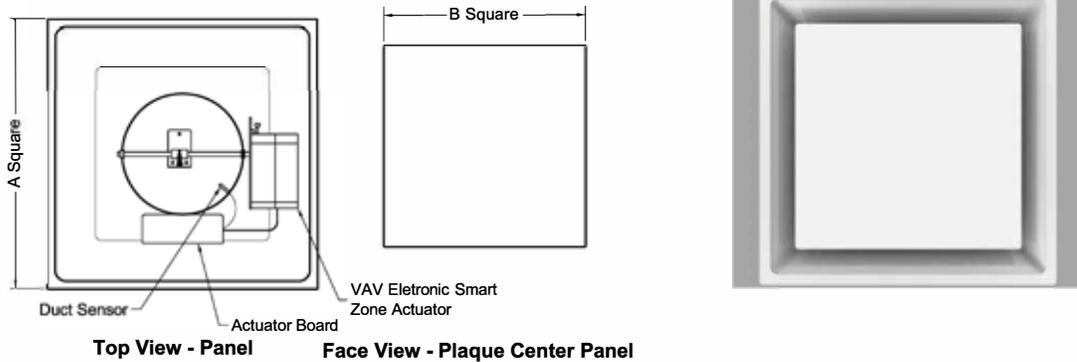

Paint Specification

Process shall be anodic electro-deposition using an anodic acrylic paint. Units shall undergo pre-treatment including a pressurized spray stage using an alkaline cleaner and a de-ionized water rinse.

MODEL XG-MSE-HC

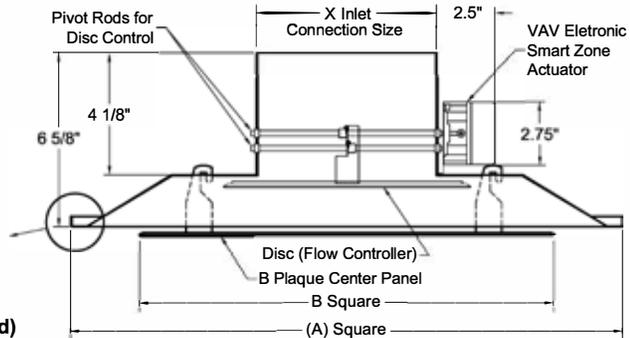

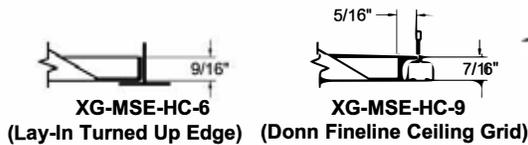

VAV Electronic Smart Zone Diffuser

Models: **XG-MSE-HC 6-12** Electronically Controlled Variable Air Volume Diffuser - Lay-In Turned Up Edge 12x12 Panel
XG-MSE-HC 6-24 Electronically Controlled Variable Air Volume Diffuser - Lay-In Turned Up Edge 24x24 Panel
XG-MSE-HC 9-12 Electronically Controlled Variable Air Volume Diffuser - Donn Finline Ceiling Grid 12x12 Panel
XG-MSE-HC 9-24 Electronically Controlled Variable Air Volume Diffuser - Donn Finline Ceiling Grid 24x24 Panel

X = Inlet sizes (Dia. in Inches)

Model	A - Diffuser Panel	B - Plaque Panel	X
XG-MSE-HC 6-12	12"	9"	6 & 8
XG-MSE-HC 6-24	24"	18"	6 - 14
XG-MSE-HC 9-12	12"	9"	6 & 8
XG-MSE-HC 9-24	24"	18"	6 - 14

Construction:

Unitary stamped seamless backpan with Removable Face Plate. Steel construction with Baked White Enamel Finish. 4-way discharge pattern.

Operation:

Incorporates an Integral Modulating Disk that continually regulates the volume of Supply Air in response to the Wall-Mounted Thermostat.

MODEL XG-900D

Model XG-900D opposed blade damper

- Butterfly style blades for sizes 6" to 12"
- 8 blade radial style for size 14"
- Blades adjusted through diffuser face
- Damper supplied with mounting hardware

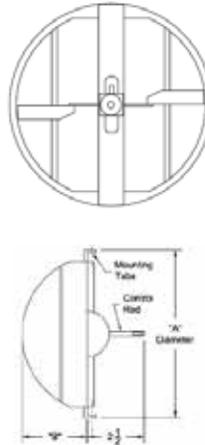

XG-900D & XG-900D* Models			
Damper Sizes	X	Y	Z
6	5 15/16	5 5/8	3
8	7 15/16	7 5/8	4
10	9 15/16	9 5/8	5
12	11 15/16	11 5/8	6
14	13 15/16	13 5/8	7

MODEL XG-BDS

Model XG-BDS butterfly damper

- Two butterfly style blades
- Blades are adjusted through the diffuser face

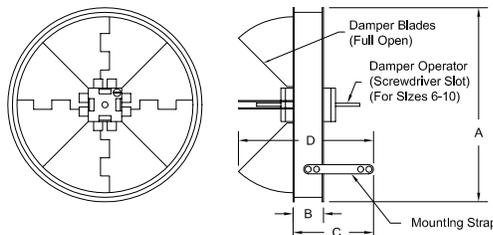

Diffuser Neck Size	XG-BDS Dimension	
	A	B
6	5 3/4	2 1/2
8	7 3/4	3 1/2
10	9 3/4	4 1/2
12	11 3/4	5 1/2
14	13 3/4	6 1/2
15	14 3/4	7
16	15 3/4	7 1/2

MODEL XG-D3

Model XG-D3 radial opposed blade damper

- For use in round diffusers
- Designed to provide full radial volume control resulting in lower than normal pressure losses
- Overlapping blade design ensures positive shut-off when required

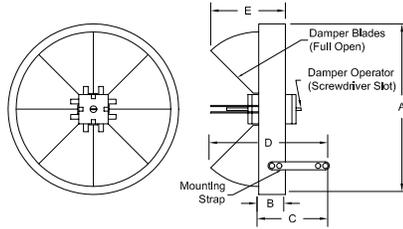

Size	A	B	C	D
6	5 7/8	1 1/4	3 1/4	4 3/4
8	7 7/8	1 1/4	3 3/4	5 1/4

30	29 7/8	1 7/8	6	11 5/8	7 1/2
36	35 7/8	1 7/8	6	13 1/8	9

MODEL XG-RSD

Model XG-RSD radial shutter damper

- Cost effective alternative to butterfly style damper
- Design permits very precise damper control and does not interfere with diffuser air patterns
- Steel construction

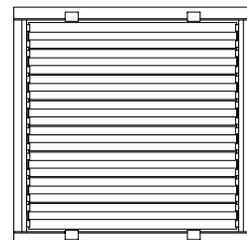

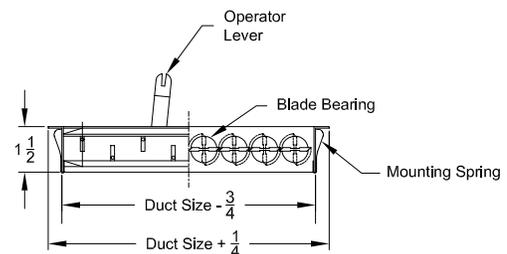

Available Sizes
6
8
10
12

MODEL XG-D5/XG-D7

Model XG-D5/XG-D7 opposed blade damper for XG-5000 and XG-7000

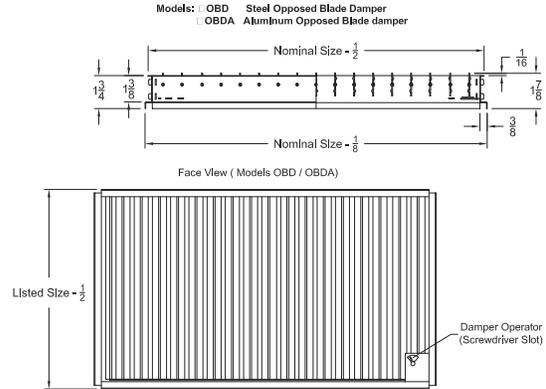

- For use with Series XG-5000, XG-D5, and Series XG-7000, XG-D7.
- Aluminum construction, XG-D5A/ XG-D7A
- Steel construction, XG-D5/XG-D7

MODEL XG-OBDA/XG-OB

Model XG-OBDA/XG-OB square/rectangular opposed blade damper

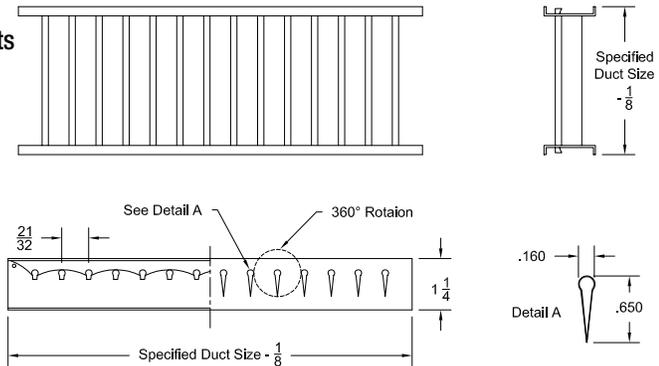

- Tapered blades set in a U-channel frame
- Opposed blades on 1" centers
- Screwdriver slot operator
- Aluminum construction, XG-OBDA
- Steel construction, XG-OB

MODEL XG-L9

Model XG-L9 – Square/Rectangular Equalizing Grid

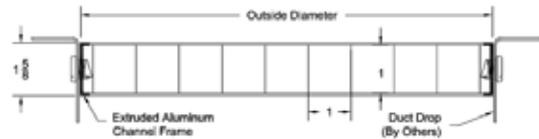

- Designed to provide uniform airflow in branch ducts
- Pre-tensioned blades adjust individually
- Aluminum construction

MODEL XG-G3

Model XG-G3 Round Equalizing Grid

- Aluminum construction
- Available in sizes from 6" to 24"

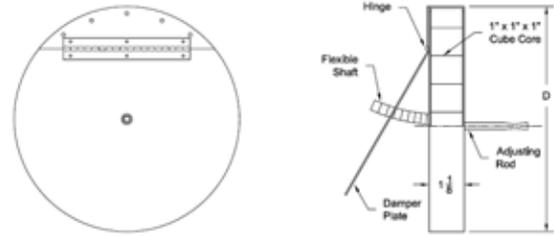

Diffuser Neck Diameter								
6	8	10	12	14	16	18	20	24
XG-G3 Outside Diameter								
5 3/4	7 3/4	9 3/4	11 3/4	13 3/4	15 3/4	17 3/4	19 3/4	23 3/4

MODEL XG-GD3

Model XG-GD3 Round Combination Grid and Damper

- For use with all diffusers
- Aluminum construction
- Sizes available from 6" to 20"

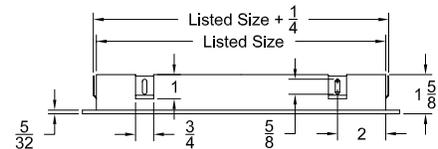

Dimension								
Size	6	6	10	12	14	16	18	20
D	5 7/8	7 7/8	9 7/8	11 7/8	13 7/8	15 7/8	17 7/8	19 7/8

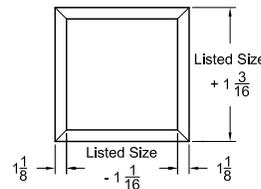

MODEL XG-TBPF

Model XG-TBPF T-bar Plaster Frames permit installation of T-bar frame style ceiling diffusers into plaster frame or gypsum ceilings, and are available in standard T-bar sizes.

- Converts T-bar frame to Surface Mount
- Available in aluminum, XG-TBPF, or steel, XG-STBPF, construction

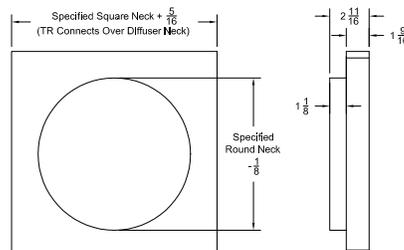

Available Size (XG-TBPF and XG-STBPF Models)	
Nominal	Overall
12 x 12	13 3/16 x 13 3/16
24 x 12	25 3/16 x 13 3/16
24 x 24	25 3/16 x 25 3/16
36 x 24	37 3/16 x 25 3/16
36 x 36	37 3/16 x 37 3/16
48 x 24	49 3/16 x 25 3/16
48 x 48	49 3/16 x 49 3/16
13 x 13	14 3/16 x 14 3/16

MODEL XG-TR/XG-TR DEEP

Model XG-TR/XG-TR Deep Square to Round Transitions

- Available for all ducted supply and return diffusers
- Provide economical means of adapting square neck diffusers to round neck connections
- TR Deep transitions provide additional depth to accommodate some dampers

Available Size	
Square Neck Size	Round Neck Size
6 x 6	4, 5 & 6
8 x 8	5, 6, 7 & 8
9 x 9	5, 6, 7, 8 & 9
10 x 10	5, 6, 7, 8, 9 & 10
12 x 12	5, 6, 7, 8, 9, 10, 11 & 12
14 x 14	5, 6, 7, 8, 9, 10, 11, 12 & 14
15 x 15	5, 6, 7, 8, 9, 10, 11, 12, 14 & 15
16 x 16	5, 6, 7, 8, 9, 10, 11, 12, 14, 15 & 16
18 x 18	5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 16 & 18
22 x 22	5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 16, 18, 20 & 22

Design and Selection Support

Enjoy Greenheck's extraordinary service, before, during and after the sale.

Greenheck offers added value to our wide selection of top performing, energy-efficient products by providing several unique service programs.

Our Quick Delivery program ensures shipment of in-stock products within 24 hours of placing your order. Our Quick Build made-to-order products are manufactured in 1-3-5-10-15 or 25-day production cycles, depending upon its complexity.

Greenheck's free computer aided product selection program CAPS®, rated by many as the best in the industry, helps you conveniently and efficiently select the right products for the challenge at hand.

Our 3D service allows you to download, at no charge, easy-to-use AutoDesk® Revit® 3D drawings for many of our ventilation products.

Find out more about these special services at greenheck.com

Building Value in Air

Greenheck delivers value to mechanical engineers by helping them solve virtually any air quality challenges their clients face with a comprehensive selection of

top quality, innovative air-related equipment. We offer extra value to contractors by providing easy-to-install, competitively priced, reliable products that arrive on time.

And building owners and occupants value the energy efficiency, low maintenance and quiet dependable operation they experience long after the construction project ends.

Our Commitment

As a result of our commitment to continuous improvement, Greenheck reserves the right to change specifications without notice.

Specific Greenheck product warranties are located on greenheck.com within the product area tabs and in the Library under Warranties.
