

CAPS Experience Improvements

CAPS Version 4.43 - December 04, 2023

- Enhanced layout features:
 - Layout questions have light gray background.
 - Blue or red color label and icons based on validation state.
 - Width of layout question increased to allow two icons to be displayed.
 - Updated the UI so the width of the answer box will match the length of the associated question for more consistent look & feel.
 - Label repositioned to allow more characters to be displayed.
 - Text in Drop down option now wraps for full display.
 - Selected option in drop down displays in bold with light blue background.
 - Checkbox Icon for custom controls Active and Modify appear different then row selector checkbox and will appear Blue for active and Gray when disabled.
- “Reset to Default” renamed to “RESET VALUE”

CAPS Version 4.42 - August 7, 2023

- First group of Dampers added to Transitional CAPS
- Batch edit is default grid experience –allowing ability to add new lines in this mode.
- User now has the capability to enlarge the grid, collapse the sales bill and reset the grid feature.

CAPS Version 4.41 - April 17, 2023

- New Fan Selector was deployed in 4.41 CAPS - improving selection efficiency.
- Ability to select and update values for multiple rows using the new **Global Edit** feature.
- Alternative edit experience using **Batch Edit** allowing you to make multiple changes in the grid and load all changes at once.
- Selecting any of the edit features -Fast Data Entry, Batch Edit or Global Edit – will transform the current grid into the experience for that feature and enables the full-screen to allow visibility to more grid rows.
- Enhanced UI fonts making the text clearer and darker for easier readability.

CAPS Version 4.40 - December 05, 2022

- First group of Louvers added to Transitional CAPS
- Interactive Row Status Icon providing error messaging (when clicked).
- Capability to customize your grid experience including the ability to select, reorder and remove columns.
- Ability to quickly enter required data in the grid using the new Fast Data Entry feature.
- Easy access on the grid menu to additional data entry functions such as “Import” and “Add by Performance.”
- New conflict messaging providing better guidance on selection conflicts.
